INDEX OF SUBJECT MATTER

COLLECTIVE REVIEWS

The Surgery of the Gall-Bladder and Biliary Tract. *James M. Neff, M.D., Chicago* 1
Lesions of Peripheral Nerves. *Major J. Frank Corbett, M.C., U.S.A.* 105
Surgery of the Stomach. *Richard Lewisohn, M.D., F.A.C.S., New York* 193
Primary Suture of War Wounds. *Roger T. Vaughan, M.D., F.A.C.S., Chicago* 281

ABSTRACTS OF CURRENT LITERATURE

ABDOMEN, Traumatic, 51
Abdominal, Penetrating, wounds, 45; Two cases of menstrual, fistula, 74; device to strengthen, wall in ventral hernia, 127; Postoperative treatment of, cases, 295; Importance of complete roentgen study of gastro-intestinal tract and gall-bladder in all obscure, cases, 311; Penetrating gunshot, wounds, 311; Peritoneal sequelæ of, war wounds, 386; Acute perforations of, viscera, 397; Treatment of, wounds at the front, 398; Analysis of 1,200 consecutive, operations for gynecological disease on Burmese females, 420; Developments in, surgery since 1884, 480
Abdominal delivery, Surgical aspects of pelvic versus, 506
Abortion, Utero-abdominal, 161; Report of foreign body in rectum simulating incomplete, 233; Relationship of syphilis to, miscarriage, and fœtal abnormalities, 336
Abscess, Retropharyngeal, in infants, 89; Surgical aspects of right subphrenic, 126; Radical treatment of peritonsillar, 175; Endobronchial treatment of bronchiectasis and bronchial, 228; Partial resection of lung for, 229; Retropharyngeal, 442; Communication on post-influenzal empyema and lung, 468; Subphrenic, in children, 491; Acute retropharyngeal, occurring in children, 515
Acapnia, Nature of surgical shock and Henderson's theory of, 324
Acidosis, And hydrogen-ion concentration, 248; Value and limitations of laboratory studies of, in surgery, 323
Acusticus, Tumors of nervus, and syndrome of cerebello-pontile angle, 39
Adenitis, Tuberculous, and its treatment by roentgenotherapy, 41
Adenocarcinoma of intestine of unusual generalization and peculiar cystic metastases, 390
Adenoma of small intestine in infant, with resulting volvulus, 130
Adenomatous prostate, Perineal prostatectomy in young adult for, 436
Adrenals, Huge hæmangioma of liver with hæmangiomata of skull and bilateral cystic, 219
"Aerochir," Radiosurgical aeroplane, 156
Aeroplane, Radiosurgical, "Aerochir," 156
After-treatment of war injuries by radium, Technique of, 457
Agote method of blood transfusion, 152
Albee operation in Pott's disease, Clinical value of, 144
Alignment, Effect of faulty skeletal upon eyes, 439
Amputation, Of breast for cancer, method for, 44; Of thigh in war surgery, 60; Modification of Stokes-Gritti, 60; Spurlike formations of bone following, 136; Conditions found in, stumps, 245; General technique for cineplastic, 318; Secondary treatment of war, stumps, 488; Clinico-statistical contribution to study of cineplastic, 488
Amyloid, Disease of kidney, Blood pressure in, 80
Anæsthesia, New method of general, 35; General, by intubation, 35; Technique of perineural, for radical surgery of maxillary sinus, 37; Cranial surgery under local, 38; Local, in inguinal hernia, 47; Radical treatment of sciatica by lumbar, 61; Spinal, with novocain and stovain, 213; Heart lesions in, 297; Spinal, 372; General, by ether in pediatrics, 372; General, by spinal route with novocain, 372; Field of local, in war hospital, 373; Local, and twilight sleep in surgery of exophthalmic goiter, 380; Regional, in breast amputation for cancer, 381; Local, in dental operations, 442; Cardiac massage in chloroform poisoning, 459; Spinal, in Maritime Hospital of L'Orient, 458; Local, in children, 458
Anæsthetics, Absorption of drugs and poisons from bladder and urethra; absorption of local, and of alkaloids, antiseptics, and salts, 84; Administration of, to soldiers, 116; Study of acid-base equilibrium of blood in naturally nephropathic animals and of functional capacity of kidney in such animals following, 164; Recent work on, 213; Study of efficiency of alkali to protect naturally nephropathic kidney against toxic effect of, 259
Anastomosis, of proximal gastric stump with jejunum, Polya's method of, 389
Aneurism, Case of spontaneous cure of femoral, 67; Arteriovenous, of subclavian vessels; extirpation after temporary disarticulation of clavicle, 153; Popliteal arteriovenous, Radical surgical treatment, 329; Traumatic, of external iliac artery, 412
Ankylosis, Cure of incipient coxalgia without, 240
Anomalies, Consideration of dental, 442
Antiseptics, Preliminary report of method for estimating in vivo the germidical activity of, 212
Antrum, Injury to face with involvement of maxillary, 218
Anus, Examination of rectum and, 394
Aponeurotic strips, Free, in mobilization of tissues and surgery of peripheral nerve injuries, 369
Apparatus, New hæmostatic, especially applicable to pulmonary hæmostasis, 459
Appendectomy, Partial or incomplete intussusception as etiologic factor in untoward postoperative sequelæ following, 231

Appendices epiploicæ, Torsion of, 477
Appendicitis, Epidemiology of acute, in relation to acute nasal and tonsillar infections, 49; Gastroduodenal ulcer and chronic, 127; In children, 131; Complicating pregnancy, Diagnosis of, 131; Severe, in child; ileosigmoidostomy and gastro-enterostomy, 233; Stenosis of ureter caused by, 342; Diagnosis of, by X-rays, 393; Painful point in acute, 394; Complications of right movable kidney, 432
Appendicular, Pseudomyxoma of, origin, 49; Case of, calculi revealed by X-rays, 232
Appendix, Supracæcal stenosis due to abnormal conditions of, 393; Hydro-, 393; Clinical significance of lymphoid hyperplasia of, 476
Army, Disqualifying factors in 1,500 cases of applicants examined for aviation service in U. S., 72
Arsenobenzol, Treatment of puerperal blood-stream infections with, 78
Arterial stupor, 67; Traumatic, 493
Arterial tension, Maximum, in normal and pathological pregnancy, labor, and puerperium, 504
Arteries, Catheterization of, and veins, 329; Traumatic obliteration of, 412
Arteriomesenteric, Ileus of duodenojejunal flexure, 306; Two cases of acute, duodenal occlusion, 390
Arteriovenous aneurism of subclavian vessels; extirpation after temporary disarticulation of clavicle, 153; Radical surgical treatment of popliteal, 329
Arthritis, Clinical report of non-specific protein therapy in treatment of, 54; Treatment of purulent, by simple arthrotomy followed by immediate active mobilization, 59; Rheumatoid, 239
Arthrodesis and bone graft in reconstruction surgery, 57
Artificial vagina; its construction; brief foreword on anomalies of genital tract, 501
Ascites, Fæcal obstruction from large cholelith in chylosis, 388
Astragalus, Fractures of, 56
Atlas, Anterior dislocation of, following tonsillectomy, 377
Aviation, Disqualifying factors in 1,500 cases of applicants examined for, service in U. S. Army, 72; Reactions of normal labyrinth; recent experience in examinations for, service in U. S. Army, 174

BACILLI, Presence of diphtheria and diphtheroid, in open wounds, 113; Treatment of colon, infections of kidney and bladder by surgical measures applied to ascending colon, 340; Consideration of methods for demonstrating tubercle, in urine, 348
Bacillus coli communis, Infection by, complicating pregnancy, labor, and puerperium, 425
Back, Importance of care in diagnosis of, conditions, 143
Back injuries and their relation to Workman's Compensation Law, 496
Bacteriology of blood in puerperal infection, 339
Barraquer suction extraction of cataract, 515
Bertolotti, Sciatica of skeletal origin due to vertebral anomalies and syndrome of, 320
Beuttner's method, Transverse cuneiform excision of uterine fundus by, 420
Bicornate uterus, New operation for, 502
Bile, Effect of prolonged drainage of, in cure of subacute and chronic pancreatitis, 51; Reconstruction of common, duct, 132
Biliary, History analysis applied to surgical diseases of, tract and pancreas, 309; Indications for, surgery in cholelithiasis and complications, 396; Value of radiologic examination in, lithiasis, 478
Birth, Injuries at, their effect on child and prevention, 506
Bladder, Of women after operation, 75; Elusive ulcer of, with further notes on rare type of bladder ulcer, 81; Absorption of drugs and poisons from, and urethra; absorption of various alkaloids, antiseptics, local anæsthetics and salts, 84; Symposium on pelvic wounds, more especially those of, and rectum, 235; Diverticula of, 260; Treatment of colon bacillus infections of kidney and, by surgical measures applied to ascending colon, 340; Very large colloid carcinoma of, 342; Repair of ureteral defect by plastic operation on wall of, 343; Gunshot wounds of, and lesions of kidneys; removal of foreign bodies from kidney, 434; Mechanism of, retention of prostatic origin, 436; Traumatic rupture of urinary, 509; Irritable, in women, 509; Excision of vesical diverticula after intravesical invagination by suction; a new method, 511
Blindness of new-born, 78
Blood, Clinical significance of irregular distribution of various cells and parasites in, stream and production of abortive leukæmic changes and splenomegaly in macacus rhesus, 64; Simple method for, cultures, 66; Superior longitudinal sinus in infants; value in transfusion and for rapid medication; adaptibility for procuring, for diagnosis, 117; Transfusion of citrated, 152; Agote method of transfusion of, 152; Study of acid-base equilibrium of, in naturally nephropathic animals and of functional capacity of kidney in such animals following an anæsthetic, 164; Treatment of, cysts of orbit, 173; Reaction following transfusion of, by sodium citrate method, 249; New method for transfusion of, and serum therapy, 327; Symposium on transfusion of, 327; Bacteriology of, in puerperal infection, 339
Blood-pressure in amyloid disease of kidney, 80
Blood-stream, Treatment of puerperal infections of, with arsenobenzol, 78
Blood-transfusion and application of recent methods in treatment of obstetrical hæmorrhage, 411
Blood-urea, Diagnostic and prognostic value of, in urology, 437
Blood-volume, In wounded soldiers; use of forced fluids by alimentary tract in restoration of, after hæmorrhage, 493; In wounded soldiers and related blood changes after hæmorrhage, 493
Bone, Observation at autopsy of cranial, plate ten months after insertion, 39; Experimental production of, in adult man apart from osteoperiostic action, 53; Arthrodesis and, graft in reconstruction surgery, 57; Use of, grafts in treatment of pseudarthroses, 58; Spur-like formations of, following amputation, 136; Deep cutanization of, in treatment of chronic osteomyelitis, 141; Grafting of, in war surgery, 141; Skin flaps for closing defects in, following osteomyelitic foci, 142; Biological aspects of freely transplanted total, grafts, 237; Giant cell growth of, and tendon sheath, 238; Guiding principles of grafting of, 238; Ununited fractures with special reference to gunshot injuries and use of, grafting, 241; Hæmorrhagic osteomyelitis and sarcoma in, 312
Bones, Cystic and fibrocystic disease of long, 136; Osteosclerosis of temporal, in chronic suppuration, 352; Fracture of hyoid, 353; Grafting of, in gunshot fractures of jaw, 375; Gunshot wounds of spongy, tissue, 399; Graft of, in femur; necrosis after ten months, followed by union after two years, 403; Tibial, graft, 403; Grafting of, in ununited fractures of mandible with special reference to pedicled graft, 464; Pathologic study of, substance, 480; Study of buried, 481; Changes produced in growing, after injury to epiphyseal

cartilage plate, 481; New operative method for radical treatment of chronic osteomyelitis, 482; Closure of cavities in, 486; Primary osteosynthesis in war surgery, 486; Studies in, transplanations; a study of a method of increasing osteogenetic power of free, transplant, 487; Regeneration of,in adult after surgical excision, 487
Borderline gastric disease, 387
Bowel, Long resections of small, 130
Bowing, Prevention of posterior, in compound fracture of femur, 484
Brachial plexus,Neurolysis of, and peri-arterial sympathectomy of humeral in a case of paralysis of, and causalgic syndrome due to war injury, 490
Brain, Symptoms, treatment, and prognosis of wounds of, based on 56 cases, 40; Serologic localization of organic lesions of, 40; Sarcoma of, 220; New system of localization and extraction of foreign bodies in, 378
Braxton-Hicks, Limits of mixed or, version in treatment of placenta prævia, 422
Breast, Cancer of, 43; Method of amputating, for cancer, 44; Value of X-rays in treatment of malignant disease of, 122; Regional anæsthesia in amputation of, for cancer, 381
Bronchi, New diagnostic sign of foreign body in, or trachea; asthmatoid wheeze, 228
Bronchial, Endobronchial treatment of bronchiectasis and, abscess, 228
Bronchiectasis, Endobronchial treatment of, and bronchial abscess, 228
Bronchoscopic and œsophagoscopic foreign bodies, 384
Bronchoscopy, Tooth impacted in secondary bronchus of left lung; removal by lower, after two unsuccessful attempts by upper, 45
Bronchus, Tooth impacted in secondary, of left lung; removal by lower bronchoscopy after two unsuccessful attempts by upper bronchoscopy, 45; Foreign body in right, illustrating value of through radiography, 383
Buried bone, Study of, 481
Burmese females, Analysis of 1,200 consecutive abdominal operations performed for gynecological disease on, 420
Burns, Clinical and histologic study of cicatrization of, under paraffinated dressings, 63; Application of concentrated solution of magnesium sulphate to scalds and, 296; Histopathology of superficial, 494

CÆCAL, Supra-, stenosis due to abnormal conditions of appendix, 393
Cæcostomy, Indications for, in treatment of dysentery, 392
Cæcum, Resection of, and ascending colon, 232, 477
Cæsarean section, In eclampsia, 161; Whether justifiable in eclampsia and placenta prævia, 253; Indications for, 336
Calculi, Incidence of, in gall-bladder as met with in 1,600 necropsies, 51; In immobilized and well-fed patients with genito-urinary infected wounds, 79; Urinary, in infancy, 84; Case of appendicular, revealed by X-rays, 232; Two instances of, in kidney; one a sequela of primary carcinoma and the other of persistent sinus formation from ureter to epidermis, 256; Some points in management of urinary, 340; Vesical, in childhood, 342
Calculus, Impacted, in vesical diverticulum removed by high frequency cauterization, 167; Cases of kidney, observed at urologic center, 257; Gastric pseudo-, 387
Cancer, Of breast, 43; Method of amputating breast for, 44; Aseptic resection of right colon for constipation, tuberculosis, or, 50; Technique of resection of left angle of colon for, 50; Influence of radium on, tissues, 62; Of cervix complicating triplet pregnancy, 73; General consideration of uterine, with special reference to diagnosis, 157; Surgical treatment of, of larynx, 175; Use of heat and radium in treatment of, of jaws and cheeks, 217; Of thyroid gland, 221; Of oral cavity, jaws, and throat; treatment by electrothermic methods or in combination with surgery, roentgen ray, and radium, 266; Of oral cavity, 353; Regional anæsthesia in breast amputation for, 381; Perforation in, of stomach, 388; Of tongue, 443; Connective-tissue theory of pathogenesis of, 49
Cancerous mucous membrane, Treatment by radium of, 147
Capparoni method in treatment of pleuritis and tubercular peritonitis, 382
Carbohydrate, Report on effect of high, feeding on nausea and vomiting of pregnancy, 423
Carcinoma, Of epiglottis and root of tongue removed by Simpson radium needles, with description of needle-placing instrument, 91; Multiple primary malignant tumors; report of case of, and sarcoma in same individual, 147; Pathogenesis and further growth of, of uterus in relation to clinical symptoms and early diagnosis, 157; Two instances of kidney calculi; one a sequela of primary, and the other of persistent sinus formation from ureter to epidermis, 256; Early diagnosis of intralaryngeal, 266; Very large colloid, of bladder, 342; Primary, of gall-bladder, 395; Primary, of third portion of duodenum, 475
Cardiac massage in chloroform poisoning, 459
Carrel method, In treatment of war wounds in 1918, 114; Value of, applied to suppurating wounds at base hospital, 296; Secondary and late sterilization of infected war wounds by, 372
Carrel-Dakin treatment at Oxford; observation of, method of treating chronic wounds in orthopedic center in England, 295
Carotid, Seton wound of primary, with complete section of internal jugular; ligature and recovery without hemiplegia, 464
Cases, Surgical, at A. E. F. evacuation hospital, 500
Cataract, Operation for senile, 251; Barraquer suction extraction of, 513
Catheterization of arteries and veins, 329
Cavities, Closure of, in bone, 486
Cerebellopontile angle, Tumors of nervus acusticus and syndrome of, 39
Cerebral, Œdema from, pressure, 220; Primary extraction of intra-, projectiles by forceps under radioscopic control; operative indications; technique; results, 379; Fluoroscopy of, ventricles, 461
Cervical, Surgical considerations on, 119; Corrective treatment of congenital, stenosis and uterine anteflexion with Iriberne apparatus, 251
Cervical ribs, Remarks upon curious case operated upon, 464
Cervicomediastinal space, Wide and economic route of approach to, 124
Cervix, Cancer of, complicating triplet pregnancy, 73
Chart for recording cystoscopic examinations, 437
Cheeks, Use of heat and radium in treatment of cancer of jaws and, 217
Chemical constitution of pus, 150
Chest, Physical examination in diseases of adult, 224; Penetrating wounds of, 225; After-effects of wounds of, and treatment, 225; Early treatment of septic pleural effusions; complications of penetrating wounds of, 227; Study of 450 cases of wounds of, with special reference to new method of treatment for infected hæmothorax, 301; Value of fluoroscopy of, 380

Childbirth, Painless, and safe conduct of labor, 426
Cholecystitis, Study on etiology of, and its production by injection of streptococci, 478; Roentgenological diagnosis of, and adhesions, 479
Choledochus, Reconstruction of, 234
Cholelithiasis, Indications for biliary surgery in, and complications, 396
Chondroma of thorax, 466
Chloroform poisoning, Cardiac massage in, 459
Choroid, Extirpation of, plexus of lateral ventricles in communicating hydrocephalus, 299; Ophthalmoscopic conditions simulating sarcoma of, 439
Chylosis ascites; fæcal obstruction from large cholelith, 388
Chylothorax, 466
Cineplastic amputations, General technique for, with method by author, 318; Clinico-statistical contribution to study of, 488
Circumcision, Section of frenum in, and in frenulum brevis, 171
Clavicle, Arteriovenous aneurism of subclavian vessels; extirpation after temporary disarticulation of, 153; Clinico-experimental study of fractures of, 483
Cleft extremities, Perodactylism, syndactylism, and, in child, 399
Cleveland and Elyria, cripple surveys, Report on, 489
Clinical value of estimation of kidney function, Certain aspects of, 507
Closed method, Surgical treatment of empyema by, 383
Closure, Liquid-tight, and treatment of infected wounds, 370
Colectomy, Five cases of partial, 233
Coloboma, Operative treatment of traumatic, of lid, 172
Colon, Aseptic resection of right, for constipation, tuberculosis, or cancer, 50; Technique of resection of left angle of, for cancer, 50; Resection of cæcum and ascending, 232, 477; Remote effects of absorption of urine from, with case of traumatic unilateral ureterointestinal anastomosis, 432
Complications, Surgical, and sequelæ of influenza, 490
Conclusions adopted at Fifth Interallied Surgical Conference for Study of War Wounds, 416
Conduct, Painless childbirth and safe, of labor, 426
Congenital gynatresia, Case of, 335
Conjunctivæ, Plasmoma of, 264
Connective-tissue theory of pathogenesis of cancer, 491
Cord, Symptomatology and diagnosis of wounds of spine and, 60; Fractures of spinal column with and without injury of, 245; Complete anatomic section of dorsal, followed by suture of, and survival for eight months, 489
Corpus luteum, 159
Coxalgia, Cure of incipient, without ankylosis, 240
Cranial, Observation at autopsy of, bone plate ten months after insertion, 39; Decompression for head injuries accompanied by signs of increased intra-, pressure, 38; Surgery under local anæsthesia, 38; Report upon, losses of substance, 119; Intra-, complications of diseases of the ear, 377
Craniocerebral wounds, Primary suture of, with suture of dura-mater, 460
Cripple surveys, Report on Cleveland and Elyria, 489
Crises, Recurrent renal, 508
Crucial ligaments, Diagnosis and treatment of injuries to, 316
Cultures, Simple method for blood, 66
Cuneiform fracture, Case of, in upper extremity of the tibia, 55
Cutaneous wounds, Laws of cicatrization of, 64
Cystic and fibrocystic disease of long bones, 136
Cysts, Treatment of blood, of orbit, 173
Cystoscopic examinations, Chart for recording, 437

DACRYOCYSTITIS, Rational etiology and satisfactory treatment of, 351
Dakin method, Sixteen cases of pleural fistula after purulent pleurisy disinfected by, and secondarily sutured, 467
Dakin's solution, Use of, in suppurative conditions within peritoneal cavity, 46
Deafness, Sudden and profound, and its significance, 85
Decompression, Cranial, for head injuries accompanied by signs of increased intracranial pressure, 38
Deformities, Prevention of, in times of peace and war, 78
Deformity, Case of congenital, of hands, supernumerary toes, and absence of tibiae, 53
Dental, Consideration of some, anomalies, 442; Local anæsthesia in, operations, 442
Diabetic patients, Surgery of, 407
Diagnosis, Importance of care in, of back conditions, 143; Surgical, 330; Of acute infection in thorax, 381; Of appendicitis by X-rays, 393; X-ray, of lung disease, 495; and treatment of certain otolaryngologic conditions, 516; New sign in, of stomach and intestinal ulcer, 388
Diagnostic value of study of pathologic changes in vivo, 494
Diaphragm, Congenital hernia of, 127; Case of interposition of intestine between, and liver, 231
Diaphragmatic hernia, Strangulated, consecutive to war wounds, 473
Diaphyseal fractures, Primary suture of soft parts in, 315; Primary closure of gunshot, 371
Diet, Atrophy of tumors produced by means of blastin-free, 322
Dilatation, Acute gastric, 387
Diphtheria, Presence of, and diphtheroid bacilli in open wounds, 113
Diphtheroid, Bacilli and diphtheria in open wounds, 113; infection of wounds, 494
Disease, Dyschondroplasia or Ollier's, 53; Blindness of newborn; a preventable, 78; Blood-pressure in amyloid, of kidney, 80; Studies of renal function during and immediately following acute infectious, 81; Value of X-rays in treatment of malignant, of breast, 122; Modern treatment of gall-stone, as affected and controlled by duodenal intubation, 129; Cystic and fibrocystic, of long bones, 136; Clinical value of Albee operation in Pott's, 144; Facial paralysis in ear, 174; Treatment of Little's, 239; Ablation of labyrinth in case with Menière's, 352
Dislocation, Recurrent, of lower jaw, 118; Anterior, of atlas following tonsillectomy, 377; Pseudocoxalgia following traumatic, of hip in boy aged four years, 483
Diverticula, Of female urethra, 343; Excision of vesical, after intravesical invagination by suction, 511
Dorsal cord, Complete anatomic section of, followed by suture of cord and survival for eight months, 489
Drainage, Treatment of hydrocele by filiform, 435
Ducts, Observations on disease conditions of salivary glands and their, 117; Obstruction of lachrymonasal, 265
Duodenal, Observations on diagnosis and treatment of gastric and, ulcers, 47; Modern treatment of gall-stone disease as affected and controlled by, intubation, 129; Results of surgical treatment in 75 cases of gastric and, ulcer, 388; Two cases of acute arteriomesenteric, occlusion, 390; Pancreatic reflux in diagnosis of ulcerations, 476

Duodenojejunal flexure, Arteriomesenteric ileus of, 306
Duodenum, Brief report of infant with congenital stricture of, 231; Primary carcinoma of third portion of, 475
Dura, Note on treatment of compound fracture of skull with open, 377; Primary suture of craniocerebral wounds with suture of, 460
Dyschondroplasia or Ollier's disease, 53
Dysentery, Indications for cæcostomy in treatment of, 392
Dystrophy adiposa genitalis, Study of, in women, 150

EAR, Plastic surgery of nose and, 37; Facial paralysis in disease of, 174; Intracranial complications of diseases of nose, throat and, 377; Frequent but neglected evidences of syphilis from side of nose, accessory sinuses, and, 441
Eclampsia, Cæsarean section in, 161; Two and one-half years' experience with conservative treatment of, 253; Is cæsarean section justifiable in, and placenta prævia, 253
Ectopic pregnancy, Diagnosis of, 161
Elbow, Results of primary excision for wounds of, 243; "No splint" treatment of fractures about shoulder, in humerus, and, 315
Embolism, Pulmonary fat, and its relation to traumatic shock, 248
Emergency surgery, 325
Emphysema, Experimental study of mediastinal, 303
Empyema, Observations in fluoroscopic study of 64 cases, 303; Streptococcus pneumonia and, affecting 8 members of one family with 7 deaths, 303; Postpneumonic, 303; Surgical treatment of, by closed method, 383, With abscess, and gangrene of lung following epidemic influenza, 385; Postinfluenzal, and lung abscess, 468
Endocarditis, Acute, in pregnancy, 254
Endocrine functions, Islands of Langerhans and their, 479
Endocrine system, Radium therapy in hyperthyroidism, with observations of, 221
Endoscopy, Use and indication of, 79
Endothelial leucocytes, Practical identification of, in differential counting, 66
Enterostomy and enterocolostomy in treatment of acute intestinal obstruction following pelvic operations, 49
Enucleation, Total, of prostate, 512
Ependymitis, Aseptic puriform menigeal reactions in course of suppurative, unilateral, ventricular, 460; Surgical treatment of gonorrhœal, 169; Pathology and treatment of seminal vesiculitis and acute, 512
Epiglottis, Carcinoma of, and root of tongue removed by Simpson radium needles, with description of needle-placing instrument, 91
Epiphyseal cartilage plate, Changes produced in growing bone after injury to, 481
Epispadias, New operation for, 82
Epithelioma, Radium treatment for in, lower lip, 374; Following lupus vulgaris and lupus erythematosus, 407
Erysipelas, Treatment of surgical, by iodine tincture, 153
Ether, Difficulties in administration of, 34; General anæsthesia by, in pediatrics, 372
Ethmoid bone, Monocular retrobulbar neuritis from hyperplasia of, 515
Ethmoiditis, Cases of acute anterior, in young subjects, 88
Evacuation, Abdominal, of pregnant uterus before viability, 423
Evacuation hospital, Surgical cases at an A. E. F., 500
Evolution, Fœtal spontaneous, 426
Examination, Necessity of complete, in laparotomy, 397
Excision, Of septic joints, 142; Transverse cuneiform, of uterine fundus by Beuttner's method, 420; Some observations on laryngotomy and, of tongue, 443; Bone regeneration in the adult after surgical, 487
Exophthalmic goiter, Toxic non-, 121; Successful therapy of, 465
Experimental, Studies on, surgical shock, 149; Further study of, parotitis, 215; Further, study of surgical shock, 248; Study of mediastinal emphysema, 303; Effect on kidney of ureterovesical anastomosis; clinical and, report, 341; Findings on significance of septicæmias, 413; Some results from, study of intestinal obstruction, 414; Pleurisy; clinical and, 467; Clinico-, study of fractures of clavicle, 483; Effect of thymus gland injection on growth and behavior of guinea-pig, 494
Extraction, Primary, of intracerebral projectiles by forceps under radioscopic control; operative indications; technique; results, 379
Extraperitoneal route in obstetrics, 422
Extra-uterine pregnancy, Ovular theory in etiology of, 76; Rupture of gravid uterus and, 422
Extravasation of urine, 347
Eye, Influence of function upon structure of, 173; Consideration of etiology of phlyctenular disease of, 264; Permanent vascular changes following injuries to, 350; Effect of faulty skeletal alignment on, 439
Eyebrow, Reconstruction of, 117
Eyelids, Plastic operation for restoration of, 461

FACIAL, Paralysis in ear disease, 174; Use of ionization in treatment of certain types of, scars, 461
Factories, Employment of pregnant women in munition, 76
Fæcal obstruction from large cholelith in; chylosis ascites, 388
Fallopian tubes, Conservative surgery in operations upon, with reference to future pregnancies, 75
Feet, Painful, 314; Conservatism in surgery of hands and, 489
Femoral, Case of spontaneous cure of, aneurism, 67; Inguinal approach in cure of, hernia, 230
Femur, A bed and some appliances for gunshot wounds of, and back, 36; Treatment of fracture of neck of, 55; Method for immediate treatment of fracture of, on battlefield at site of casualty, 138; Primary treatment of fractures of, 317; Treatment of cases of fractured, at base hospital in France, 401; Fracture of neck of, 402; Bone graft of, followed by necrosis after ten months and union ofter two years, 403; Central luxation of, or pelvic irruption of head of, 484; Prevention of posterior bowing in compound fracture of, 484; Notes on gunshot fractures of, 485
Fibroid tumors, Observation on, of uterus, 157; Final results of X-ray treatment of, of uterus, 157; Two hundred and ten, treated by radium, 158; Red degeneration of, during and following pregnancy, 251
Fibroma of posterior intracranial fossa, 460
Filiform, Flexible metallic ureteral sound with, guide, 84; Treatment of hydrocele by, drainage, 435
Fingers, Restoration of function to stiff, 135
Fistula, Two cases of menstrual abdominal, 74; Autoplasti methods applicable to treatment of urethral, following war wounds, 168; Operative treatment of urethral, 168; Salivary, 375; Sixteen cases of pleural, after purulent pleurisy disinfected by Dakin method and secondarily sutured, 467
Flatfoot, 405
Fluoroscopic study of empyema, 303
Fluoroscopy, Value of chest, 380; Of cerebral ventricles, 461

Fœtal, Relationship of syphilis to abortion, miscarriage and, abnormalities, 336; Spontaneous evolution, 426; Case of, polycystic kidney and its probable pathogenesis, 431
Foot, Problems and treatment of, with unseasoned troops, 54; Boot heels as cause of flat-, soldier's heart, and myalgia, 138; Problem, 143
Forceps rotation of head in persistent occipitoposterior position, 338
Foreign bodies, New system of localization and extraction of, in brain, 378; In right bronchus illustrating value of thorough radiography, 383; Some bronchoscopic and œsophagoscopic, 384; Gunshot wounds of bladder; lesions of kidney; removal of, from kidney, 434
Fossa, Fibroma of posterior intracranial, 460
Fracture, Treatment of, of neck of femur, 55; Case of cuneiform, of upper extremity of tibia, 55; Method for immediate treatment of, of femur on battlefield at site of casualty, 138; Of hyoid bone, 353; Note on treatment of compound, of skull with open dura, 377; Treatment of thigh, with modified Thomas splint, 400; Report of treatment of cases of, of the femur at a base hospital in France, 401; Of neck of femur, 402
Fractures, Of astragalus, 56; Observation on, 56; Primary and delayed primary suture in treatment of war, 72; Ununited, of mandible, 90; In warfare, 130; Treatment of gunshot, of mandible, 215; Ununited, with special reference to gunshot injuries and use of bone grafting, 241; Three stage treatment of large comminutive bursting diaphyseal, 242; And articular war injuries of lower limbs, 243; Observations on operative treatment of, 244; Osteosynthesis in war, with exception of pseudarthroses, 244; Of spinal column with and without cord injury, 245; Triangle splint in treatment of compound, of humerus, 298; Of lower jaw, 299; As related to general practitioner, 314; "No splint" treatment of, about shoulder, in humerus, and elbow, 315; Considered as potential deformities, 315; Primary suture of soft parts in diaphyseal, 315; Primary treatment of femur, 317; Primary closure of gunshot diaphyseal, 371; Bone grafting in gunshot, of jaw, 375; Bone grafting in ununited, of mandible with special reference to pedicled graft, 464; Of upper end of humerus, 483; Clinico-experimental study of, of clavicle, 483; Prevention of posterior bowing in compound, of femur, 484; Notes on gunshot, of femur, 485; Use of orthodontic appliances in treatment of, of mandible and maxilla from war casualties, 516
Frenum, Section of, in circumcision and in frenulum brevis, 171
Frontal sinus, Blood-clot dressing in surgery of, 441

GALL-BLADDER, End results of, operations, 51; Incidence of calculi in, in 1,600 necropsies, 51; Secretory pressure of liver with special reference to presence or absence of, 132; Radiography of, 234; Primary carcinoma of, in 234 proved instances of disease, 395; Study on etiology of cholecystitis and its production by injection of streptococci, 478; Slight symptoms in, disease with marked gross pathologic lesions, 478; Roentgenologic diagnosis of cholecystitis and adhesions, 479
Gall-stone, Modern treatment of, disease as affected and controlled by duodenal intubation, 129
Gall-stones, Prevention of recurrence of symptoms following operations for, 396
Ganglion, Operable tumor involving gasserian, 219
Gangrene, Treatment of gas-, by antigangrenous sera, 65; Serotherapy of, of war wounds, 152; Puerperal uterine, 163; Empyema, abscess, and, of lung following epidemic influenza, 385; Reactions in gas-, 413; Pulmonary, treated and cured by artificial pneumothorax, 469; Determination of pathogenesis and serum treatment of gas-, according to experimental action of specific sera, 493
Gangrenous infections of war wounds, Etiology of gaseous and non-gaseous, 330
Gasserian ganglion, Operable tumor involving, 219; Treatment of neuralgia of fifth nerve by injection of, 299
Gastric, Observations on diagnosis and treatment of, and duodenal ulcers, 47; Pseudocalculus, 387; Acute, dilatation, 387; Borderline, disease, 387; Results of surgical treatment in 75 cases of, and duodenal ulcer, 388; Polya's method of anastomosing proximal, stump with jejunum, 389; Surgery of, ulcer, 475
Gastrocolic ligament, Some dispositions of, 126
Gastroduodenal ulcer and chronic appendicitis, 127
Gastro-enterostomy, With and without suture, 48; End-results of, in non-complicated stomach ulcer, 128; Transient and alimentary glycosuria after, for pyloric stricture of ulcerous origin, 129; Severe appendicitis in child; ileosigmoidostomy and, 233; Vicious circle after, and means of remedying it, 306; Fæcaloid vomiting due to jejunocolic fistula from peptic ulcer in old case of, 475
Gastro-intestinal tract, Importance of complete study of, and gall-bladder in all obscure abdominal cases, 311
Gastrojejunal and secondary jejunal ulceration, 390
Gaucher type of splenomegaly, 409
Genital, Note on treatment of wounds of, organs in warfare, 83; Radical treatment of, prolapse in women by suture of levators and urogenital supports above vagina, 252; Treatment of, tuberculosis in male, 347
Genital tract, Artificial vagina; its construction; brief foreword on anomalies of, 501
Genito-urinary, Calculi in immobilized and well-fed patients with, infected wounds, 79; Tuberculosis in children, 348
Germicidal activity of antiseptics, Preliminary report of method for estimating in vivo, 212
Gland, Surgical importance of interscapular, 42; Technique of operative approach to tumor of pituitary, 119; Cancer of thyroid, 221; Mixed tumor of lachrymal, 265; Surgical pathology of human prostate, 346
Glands, Observations on disease conditions of salivary, and their ducts, 117
Glaucoma, Postciliary scleral trephining for acute, 350
Glioma of retina with report of 3 cases treated with radium, 264
Glycosuria, Transient and alimentary, after gastro-enterostomy for pyloric stricture of ulcerous origin, 129
Goiter, Toxic non-exophthalmic, 121; Metastatic, 379; Local anæsthesia and twilight sleep in surgery of exophthalmic, 380; Statistical study of simple and toxic, at Jefferson Barracks, Mo., 465; Successful therapy of exophthalmic, 465
Gonococcus, Renal and ureteral infection with, 429
Gonorrhœal, Surgical treatment of, epididymitis, 169; Seminal vesiculotomy in treatment of, rheumatism, 345
Graft, Bone, of femur followed by necrosis after ten months and union after two years, 403; Tibial bone, 403
Grafts of saphenous vein into urethra, 434

Grafting, Of tissues into nearly related individuals in rat, and mode of inheritance of individuality-differentials, 69; Bone, in war surgery, 141; Outlines of a new instrument for use in skin, in radical mastoid cavity, 440
Grippe, Surgical sequelæ of, 124
Growth, Effect of thymus gland injection on, and behavior of guinea-pig, 494
Gunshot, Bed and some appliances for, wounds of femur and back, 36; Methods of control of fragments in, wounds of jaw, 36; Restoration of function after penetrating, wounds of knee-joint, 55; Pathology of peripheral nerves in, wounds, 62; Wounds of knee-joint as seen at a base hospital, 135; Treatment of, wounds of face accompanied by extensive destruction of lower lip and mandible, 176; Notes on 161 cases of, wounds of head, 214; Treatment of, fractures of mandible, 215; Affections of large joints due to, wounds; their late results and treatment, 240; Ununited fractures; with special reference to, injuries and use of bone grafting, 241; Penetrating, abdominal wounds, 311; Primary closure of, diaphyseal fractures, 371; Wounds of spongy bone tissue, 399; Infected, injuries of hip, 400; Operative treatment of, wounds of spine with grave paralyses, 405; Wounds of bladder; lesions of kidneys; removal of foreign bodies from kidney, 434; War wounds of maxillary sinus, 463; Notes on, fractures of femur, 485
Gynatresia, Case of congenital, 335
Gynecological disease, Analysis of 1,200 consecutive abdominal operations performed on Burmese females for, 420
Gynecology, Recent progress in, 160; Problems of ureteral surgery in, 503

HÆMANGIOMA, Of scalp, 116; Huge, of liver associated with hæmangiomata of skull and bilateral cystic adrenals, 219
Hæmatopoietic system, Some phases of radium action with special reference to, 151
Hæmaturia, Renal, 508
Hæmorrhage, Treatment of, of uterus with radium and roentgen rays, 73; Control of, in vaginal hysterectomy, 74; Radiotherapeutic methods in treatment of uterine, 158; Histogenesis and pathology of subdural, 220; Blood transfusion and application of recent methods in treatment of obstetrical, 411; Secondary, as observed in war surgery, 492; Blood volume in wounded soldiers; blood volume and related blood changes after, 493; Blood volume in wounded soldiers; use of forced fluids by alimentary tract in restoration of blood volume after, 493
Hæmostatic apparatus, New, especially applicable to pulmonary hæmostasis, 459
Hæmothorax, Study of 450 cases of wounds of chest; with special reference to new method of treatment for infected, 301
Hand, Orthopedic operations on, 142; Orthopedic reconstruction on, and forearm, 404
Hands, Cases of congenital deformity of, supernumerary toes and absence of tibiæ, 53; Emergency suggestions; conservatism in surgery of, and feet, 489
Harelip, Surgical correction of double, with alveolar cleft and cleft of hard and soft palate, 89
Head, Cranial decompression for, injuries accompanied by signs of increased intra-cranial pressure, 38; Notes on 161 cases of gunshot wounds of, 214; Need of more frequent roentgenological examinations in injuries of, 495
Hearing test to detect malingering, 86
Heart, Sarcoma of, 45; Risk in surgical operations, 63; Boot heels as cause of flat-foot, soldier's, and myalgia, 138; Lesions in anæsthesia, 297; New technique of massage of, with case of resuscitation, 469; Reanimation of, by massage by thoracic route, 470; Operative indications for projectiles in, 471; Extraction of projectile situated in wall of, by median thoracolaparotomy, 472; Projectile traveling by venous route and free in right ventricle of, 472
Hemianopsia, Bitemporal, due to acute suppuration of posterior nasal sinuses, 515
Henderson's theory of acapnia, Nature of surgical shock and, 324
Hernia, Local anæsthesia in inguinal, 47; Ventral, and device to strengthen abdominal wall, 127; Congenital, of diaphragm, 127; Inguinal approach in cure of femoral, 230; Inguinal, 230; Simple operation for double inguinal, with one incision, 230; Mesenteric disinsertion in strangulated, 231; Sacropubic, and prolapsus uteri, 419; Cure of inguinal, 473; Strangulated diaphragmatic, consecutive to war wounds, 473
Hip, Infected gunshot injuries of, 400; Pseudocoxalgia following traumatic dislocation of, in a boy aged 4 years, 483
Histopathology of superficial burns, 494
Historical development of public provision for the disabled soldier, 498
Hormone, Studies in thyroid therapy; effects of thyroid, as determined by clinical, metabolic and dietetic investigation, 43
Hospital, Need of systematic teaching of, internes, 71; An English orthopedic, 249; Legislation in Minnesota, 498; Surgical cases at an A. E. F. evacuation, 500
Humerus, Triangle splint in treatment of compound fractures of, 298; "No-splint" treatment of fractures about shoulder, in, and elbow, 315; Fractures of upper end of, 483
Hydatiform degeneration, with deductions from over 150 new cases, 255
Hydro-appendix, 393
Hydrocele, Treatment of, by filiform drainage, 435
Hydrocephalus, Extirpation of choroid plexus of lateral ventricles in communicating, 299
Hydrogen-ion, Acidosis and, concentration, 248
Hydronephrosis, Absorption of renal pelvis in, due to permanent and complete occlusion of ureter, 430
Hygiene, State and prenatal, 162
Hyoid bone, Fractures of, 353
Hypernephroma of falciform ligament of liver, 234
Hyperplasia, Clinical significance of lymphoid, of appendix, 476; Monocular retrobulbar neuritis from, of ethmoid bone, 515
Hyperthyroidism, Radium therapy in, with observations of endocrinous system, 221
Hypertrophy, Pitfalls in diagnosis and treatment of senile, of prostate, 436
Hypogastric deviation of urine in treatment of urethral wounds, 344
Hypophyseal tumors through intradural approach, 41
Hypospadias, Case of complete, and free transplant of vena saphena magna as urethral substitute, 435
Hysterectomy, Control of hæmorrhage in vaginal, 74

ILEOSIGMOIDOSTOMY and gastro-enterostomy in severe appendicitis in child, 233
Ileotyphlocolic, Four cases of, invagination treated by evagination and lateral ileocolostomy, 232
Ileus, Arteriomesenteric, of duodenojejunal flexure, 306
Iliac artery, Traumatic aneurism of external, 412

Immunity, And tissue transplantation; comparison of heterotransplantation and homotransplantation, 68; Influence of heat and radium upon induced, against transplanted animal tumors, 148; To infection; presence of specific substances in leucocytes of immunized animals, 495
Immunize, Investigation of power of mesodermal derivatives to, mice against transplantable tumors, 407
Indications and technique of secondary suture, 213; Operative, and prognosis in grippal purulent pleurisies, 383; In kidney surgery, 432
Indigo-carmine output, Simple method of estimating, 81
Infected wounds, Liquid-tight closure and treatment of, 370; Secondary and late sterilization of, by Carrel method, 372
Infection, Physical factors influencing, 249; Etiology of gaseous and non-gaseous gangrenous, of war wounds, 330; Stillbirth due to, 338; Roentgenographic studies of tissues involved in chronic mouth, 353; Diagnosis of acute, in thorax, 381; Immunity to, and the presence of specific substances in leucocytes of immunized animals, 495; Diphtheroid, of war wounds, 494
Influenza, Empyema, abscess, and gangrene of lung following epidemic, 385; Surgical complications and sequelæ of, 490
Inguinal, Simple operation for double, hernia; one incision, 230; Hernia, 230; Approach in cure of femoral hernia, 230; Cure of, hernia, 473
Inheritance, Grafting of tissues into nearly related individuals in rat and mode of, of individuality-differentials, 69
Injections of saccharose, 384
Injuries, Free aponeurotic strips in mobilization of tissues and surgery of, of peripheral nerves, 369; Infected gunshot, of hip, 400; Recognition and management of, of labor, 427; Need of more frequent roentgenological examinations in, of head, 495; Of back and their relation to Workman's Compensation Law, 496; At birth; effect on child and prevention, 506
Injury, Review of year's work at jaw, center, 375; Preliminary note on investigations of 1,000 consecutive cases of, to peripheral nerve, 406; Primary sarcoma of prostate with rapid growth following, 435
Internes, Need of systematic teaching of hospital, 71
Interscapsular gland, Surgical importance of, 42
Intestinal, Obstruction due to Meckel's diverticulum, 48; Obstruction, 307; New diagnostic sign of stomach and, ulcer, 388; Case of, perforation by bullet; resection; suture; recovery, 390; Results from experimental study of, obstruction, 414; Polyadenomata, 474
Intestine, Adenoma of small, in infant and resulting volvulus, 130; Studies on aseptic end-to-end anastomosis of, 307; Tumors of large, 308; diaphragm and liver, case of interposition of, between, 231; Adenocarcinoma of, of unusual generalization and peculiar cystic metastases, 390
Intracranial, Complications of diseases of ear, nose, and throat, 377; Fibroma of posterior, fossa, 460
Intradural, Benign, tumors of optic nerve and surgical treatment, 513
Intubation, General anæsthesia by, 35
Intussusception, Surgical treatment of, 130; Partial or incomplete, as etiological factor in untoward postoperative sequelæ following appendectomy, 231
Iodine, Treatment of surgical erysipelas by tincture of, 153
Ionization, Treatment of sepsis by zinc, 370; Use of, in treatment of certain types of facial scars, 461
Iribarne apparatus, Corrective treatment of congenital cervical stenosis and uterine anteflexion with, 251
Irritable bladder in women, 509
Ischæmic myositis; Clinical lecture on, 137
Islands of Langerhans and their endocrine functions, 479

JAUNDICE, Acholuric, treated by splenectomy, 36
Jaw, Recurrent dislocation of lower, 118; Treatment of tumors of upper, with cautery, 216; Fractures of lower, 299; Bone grafting in gunshot fractures of, 375; Review of year's work at a, injury center, 375
Jaws, Methods of control of fragments in gunshot wounds of, 36; Use of heat and radium in treatment of cancer of, and cheeks, 217; Two cases of almost complete phosphorous necrosis of, 217; Cancer of, and of oral cavity and throat; treatment by electrothermic methods or in combination with surgery, roentgen ray, and radium, 266
Jejunal ulceration, Secondary, and gastro-, 390
Jejunocolic fistula, Fæceloid vomiting due to, from peptic ulcer in old case of gastro-enterostomy, 475
Jejunum, Polya's method of anastomosing proximal gastric stump with, 389
Joint, Gunshot wounds of knee-, as seen at a base hospital, 135; Mechanical derangement of knee-, 138; Symptoms attributed to lesions of sacro-iliac, 238; Disinfection of knee-, 243; Results of primary excision for wounds of elbow-, 243; Loose osteocartilaginous bodies in shoulder-, 313
Joints, Excision of septic, 142; Affections of large, due to gunshot wounds; late results and treatment, 240; Demonstrable luxation of sacro-iliac, 317; Treatment of flail, following resections, 318
Jugular, Complete section of, and seton wound of primary carotid; ligation and recovery without hemiplegia, 464

KIDNEY, Recurrence of stone in, 79; Management of subparietal injuries of, 80; Blood-pressure in amyloid disease of, 80; Treatment of war traumatisms of, and of ureter at base hospitals, 165; Abnormalities of, and ureter, 166; Two instances of, calculi; one a sequela of primary carcinoma and the other of persistent sinus formation from ureter to epidermis, 256; Cases of, calculus observed at a urologic center, 257; Study of efficiency of alkali to protect a naturally nephrotic, against toxic effect of an anæsthetic, 259; Case of pancreatic cyst in association with tubercular, and intestinal complications, 310; Treatment of colon bacillus infections of, and bladder by surgical measures applied to descending colon, 340; Effect on, of ureterovesical anastomosis, 341; Case of fœtal polycystic, and its probable pathogenesis, 431; Appendicitis complications of right movable, 432; Indications for surgery of, 432; Acute and subacute unilateral infectious nephritis without pyuria from affected side, 507; Recurrence of stone in, after operation, 508; recurrent renal crises, 508; Renal hæmaturia, 508
Kidney function, Clinical value of estimation of, 507
Kidney pain, Some causes of, and their treatment, 507
Kidneys, Bacteriology of tuberculous, 164; Gunshot wounds of bladder; lesions of, and removal of foreign bodies from, 434
Knee, Restoration of function after penetrating gunshot wounds of, 55; Conservative treatment of, wounds, 58; Mechanical derangement of, 138; Disinfection of, 243; Operative treatment of ruptured internal lateral ligament of, 402;

LABOR, Significance of fever at time of, 77; Indications and limitations for induction of, 161; Complicated by infection by Bacillus coli communis, 425; Painless childbirth and safe conduct of, 426; Nitrous oxid in, 426; Recognition and management of, injuries, 427; Injuries at birth; effect on child and prevention, 506; Surgical aspects of pelvic versus abdominal delivery, 506
Labyrinth, Resections of normal, as noted in recent experiences in U. S. Aviation examinations, 174; Ablation of, in Menière's disease, 352
Lachrymal gland, Mixed tumor of, 265
Lachrymonasal duct, Obstruction of, 265
Lambotte plate, Biologic researches on osteosynthesis with, 59
Laminectomies in war traumatisms, 490
Lane plate, Use and value of, 485
Langerhans, Islands of, and their endocrine functions, 479
Laparotomy throughout the ages, 235; Necessity of complete examination in, 397
Laryngeal, Early diagnosis of intra-, carcinoma, 266; Treatment of, stenosis by corking tracheotomic cannula, 516
Laryngitis, Prevention versus treatment in tuberculous, 88
Laryngologic conditions, Diagnosis and treatment of certain oto-, 516
Laryngotomy, Observations on, and excisions of tongue, 443
Larynx, Treatment of new-growths of, by internal surgical methods, 88; Removal of foreign bodies from, disproving previously made diagnosis, 89; Surgical treatment of cancer of, with report of case, 175
Lateral sinus thrombosis, Spontaneous recovery from, 514
Legislation, Hospital, in Minnesota, 498
Lens, Successful extraction of opaque and dislocated crystalline, 351
Leucocytes, Practical identification of endothelial, in differential counting, 66; Immunity to infection; the presence of specific substances in, of immunized animals, 495
Leukæmia, Thymus tumor associated with acute lymphatic 44; Splenectomy following radium treatment for myelocytic, 396
Ligament, Some dispositions of gastrocolic, 126; Hypernephroma of falciform, of liver, 234; Diagnosis and treatment of injuries to crucial, 316; Pathogenesis and pathology of phlegmons of broad, 334; Operative treatment of ruptured internal lateral, of knee, 402
Lip, Radium treatment of epithelioma of lower, 374; Total reconstruction of upper, 374
Lipovaccine, Antistreptococcus vaccination of war wounds by, and ether-sensitized vaccine, 492
Lithiasis, Value of radiologic examination in biliary, 478
Little's disease, Treatment of, 239
Liver, Secretory pressure of, with special reference to presence or absence of gall-bladder, 132; Hugh hæmangioma of, associated with hæmangioma of skull and bilateral cystic adrenals, 219; Syphilitic peritonitis as frequent cause of ascites in cirrhosis of, 229; Case of interposition of intestine between diaphragm and 231; Hypernephroma of falciform ligament of, 234; Treatment of, wounds, 394
Local anæsthesia, Field of, in war hospital, 373; In children, 458
Localization, New system of, and extraction of foreign bodies in brain, 378
Lumbar anæsthesia, Radical treatment of sciatica by, 61
Lumbosacral region, Classification of disturbances of sphincteric control resulting from wounds and contusions of, 261
Lung, Tooth impacted in secondary bronchus of left, and removed by lower bronchoscopy after two unsuccessful attempts by upper bronchoscopy, 45; Partial resection of, for abscess, 229; Progress in, surgery, 304; Empyema, abscess and gangrene of, following epidemic influenza, 385; Communication on postinfluenzal empyema and, abscess, 468; Stereoroentgenograms of injected, as an aid to study of architecture of, 468; Primary malignant neoplasms of, and pleura, 469; X-ray diagnosis of, disease, 495
Lupus erythematosus, Epithelioma following lupus vulgaris and, 407
Lupus vulgaris, Epithelioma following, and lupus erythematosus, 407
Luxation, Demonstrable, of sacro-iliac joints, 317; Central, of femur or pelvic irruption of head of femur, 484
Lymphatic leukæmia, Thymus tumor associated with acute, 44
Lymphocytes, Studies on X-ray effects; stimulative action on, 415
Lymphocytic reaction, Multiple transplantations of thyroid and, 120
Lymphoid hyperplasia of appendix, Clinical significance of, 476

MAGNESIUM sulphate, Application of concentrated solution of, to scalds and burns, 296
Malignant neoplasms, Primary, of lung and pleura, 469
Malingering, Hearing test to detect, 86
Management, Recognition and, of labor injuries, 427
Mandible, Incidence, causation, and treatment of ununited fractures of, 90; Treatment of gunshot wounds of face accompanied by extensive destruction of lower lip and, 176; Treatment of gunshot fractures of, 215; Bone grafting in ununited fractures of, with special reference to pedicled graft, 464; Use of orthodontic appliances in treatment of fractures of, and maxilla from war casualties, 516
Massage, New technique of heart, with case of resuscitation, 469; Reanimation of heart by, by thoracic route, 470
Mastitis, Studies in bovine; non-hæmolytic streptococci in inflammation of udder, 70
Mastoid, Modern, operation, 352; Answers to opponents of radical, operation, 352
Mastoid cavity, New instrument used in skin grafting in radical, 440
Mastoid structure, Observations of, as revealed by roentgen-ray examination, 514
Mastoiditis, Acute, as complication of infectious diseases in 123 cases in base hospital, Camp Selby, Miss., 87
Maxilla, Treatment of tumors of superior, 218
Maxillary, Technique of perineural anæsthesia for radical surgery of, sinus, 37; Closure of palatal branch after resection of superior, 91; Injury to face with involvement of, antrum, 218; Gunshot war wounds of, sinus, 463
Meatotomy, Painless, 169
Meckel's diverticulum, Intestinal obstruction due to, 48
Median, General principles of splinting for paralysis from nerve injuries; special application in, and ulnar nerve paralyses, 247
Mediastinal emphysema, Experimental study of, 303
Megacolon, Surgical treatment of chronic constipation in pericolitis and ileopelvic, 308
Menière's disease, Ablation of labyrinth in case of, 352
Meningeal, Clinical study of osteitis of apex of petrous bone; treatment of meningitis by lavage of, cavities, 378; Aseptic puriform, reactions in course of suppurative, unilateral, ventricular ependymitis, 460
Meningococcic pericarditis, 385

Menopause from standpoint of mental disorder, 74
Menstrual abdominal fistula, Two cases of, 74
Mental disorder, Menopause from standpoint of, 74
Mesenteric disinsertion in strangulated herniæ, 231
Mesodermal derivatives, Investigation of the power of, to immunize mice against transplantable tumors, 407
Metabolic, Studies in thyroid therapy; effects of thyroid hormone as determined by clinical, dietetic, and, investigation, 43
Metastases, Adenocarcinoma of intestine of unusual generalization and peculiar cystic, 390
Metastatic goiter, 379
Metritis, Pathology of chronic, and chronic subinvolution, 419
Military, Clinical observations in, roentgenology, 71; Some aspects of, ophthalmology, 154
Minnesota, Hospital legislation in, 498
Mouth, Roentgenographic studies of tissues involved in chronic infections of, 353
Moving picture, Teaching surgery by, 497
Munition factories, Employment of pregnant women in, 76
Myalgia, Boot heels as cause of flat-foot, soldier's heart, and, 138
Myological principles; a new ulnar splint, 373
Myomata uteri, Study of 1,500 selective cases of, operated upon at Woman's Hospital, 1910 to 1917, 73
Myositis, Clinical lecture on ischæmic, 137

NARCOSIS, Scopolamin-morphin, or twilight sleep, 505
Nasal, Epidemiology of acute appendicitis in relation to acute, and tonsillar infections, 49; And paranasal plastics for war injuries, 298; Bitemporal hemianopsia due to acute suppuration of the posterior, sinuses, 515
Nausea, Effect of high carbohydrate feeding on, and vomiting of pregnancy, 423
Neck, Fracture of, of femur, 402
Necrosis, Two cases of almost complete phosphorous, of jaw, 217; Bone graft of femur followed by, after ten months and union after two years, 403
Neoplasms, Primary malignant, of lung and pleura, 469
Nephritis, Acute and subacute unilateral infectious, without pyuria from affected side, 507
Nephropathic, Study of acid-base equilibrium of blood in naturally, animals and of functional capacity of kidney in such animals following an anæsthetic, 164; Study of the efficiency of alkali to protect naturally, kidney against the toxic effect of an anæsthetic, 259
Nerve, Direct suture of, in injury, 62; Opticociliary neurectomy and resection of optic, as substitute for enucleation, 86; Orthopedic treatment of, lesions, 146; Experimental research on protection of, wounds, 146; Some notes on operative procedure in, injuries, 247; General principles of splinting for paralysis of, injuries; special application of principles in median and ulnar, paralyses 247; Treatment of neuralgia of fifth, by injection of gasserian ganglion, 299; Free aponeurotic strips in mobilization of tissues and surgery of injuries of peripheral, 369; Resection of auricolotemporal, and its effect on parotid secretion, 374; Preliminary note on investigations upon 1,000 consecutive cases of peripheral, injury, 406; Paralysis of sixth cranial, in association with otitis media, 440
Nerves, Pathology of peripheral, in gunshot wounds, 62; Injuries to peripheral, as observed in soldiers returned to this country for reconstruction work and care, 144; Repair of large gaps in peripheral, by neuroplasty, 146; Injuries of peripheral, from surgical standpoint, 321; Surgical intervention in gunshot wounds of, 322
Nervus abducens, Variation in distribution of, in man, 376
Nervus acusticus, Tumors of, and syndrome of cerebellopontile angle, 39
Neuralgia of fifth nerve, Treatment of, by injection of gasserian ganglion, 299
Neuritis, Monocular retrobulbar, from hyperplasia of ethmoid bone; report of 3 cases with operation, 515
Neurofibromatosis of orbit, 264
Neuroplasty, Repair of large gaps in peripheral nerves by, 146
Nitrous oxid in labor, 426
Nose, Plastic surgery of, and ears, 37; Epidemic streptococcus infection of, and throat clinically considered, 175; Intracranial complications of diseases of ear, throat, and, 377; Frequent but neglected evidences of syphilis from accessory sinuses, ear, and side of, 441; Constructing a new, 462; Reconstruction of an injured, 463
Novocain, General anæsthesia by spinal route with, 372

OBLITERATION, Traumatic, of arteries, 412
Obstetrical hæmorrhage, Blood transfusion and application of recent methods in treatment of, 411.
Obstetrics, Extraperitoneal route in, 422
Obstruction, Intestinal, due to Meckel's diverticulum, 48; Enterostomy and enterocolostomy in treatment of acute intestinal, following pelvic operations, 49; Intestinal, 307; Results from experimental study of intestinal, 414
Occipitoposterior positions, Forceps rotation of head in persistent, 338
Occlusion, Two cases of acute arteriomesenteric duodenal, 390
Ocular wounds, Prognosis and treatment of, with penetration of foreign bodies, 264; Results of early treatment of, 439
Œdema, Cerebral, from pressure, 220
Œsophageal, Imperforation, 305; Plastics by free transplants of intestine, 472
Œsophagoscopic and bronchoscopic foreign bodies, 384
Œsophagus, Treatment of lye strictures of, 304
Ollier's disease or dyschondroplasia, 53
Operation, New, for uterus bicornate, 501
Ophthalmology, Some aspects of military, 154
Ophthalmoscopic conditions simulating sarcoma of choroid, 439
Optic disk, Case of hyaline bodies on, 174
Optic nerve, Benign intradural tumors of, and surgical treatment, 513
Opticociliary neurotomy, resection of optic nerves; substitute for enucleation, 86
Oral cavity, Cancer of, 353
Orbit, Treatment of blood cysts of, 173; Neurofibromatosis of, 264
Orbital tumors, Report of two cases of, 350
Orthodontic appliances, Use of, in treatment of fractures of mandible and maxilla from war casualties, 516
Orthopedic, Vicious scars of war wounds and their surgical, treatment, 141; Operations on hand, 142; Treatment of nerve lesions, 146; An English, hospital, 249; Surgical technique in, surgery, 319; Reconstruction on hand and forearm, 404
Osteitis, Of war, 134; Resection of sacrum for chronic, following wound of sacral region, 246; Clinical study of, of apex of petrous bone; treatment of meningitis by lavage of meningeal cavities, 378

Osteocartilaginous loose bodies in the shoulder-joint, 313
Osteogenetic power, Studies in bone transplantations; a study of a method of increasing, in free bone transplant, 487
Osteomyelitic foci, Skin flaps for closing bone defects following, 142
Osteomyelitis, Series of severe cases of, 54; Of spine, 61; Deep cutanization of bone in treatment of chronic, 141; Hæmorrhagic, and sarcoma in bone, 312; New operative method for radical treatment of chronic, 482
Osteoperiostic action, Experimental production of bone in adult man apart from, 53
Osteosclerosis of temporal bone in chronic suppuration, 352
Osteosynthesis, Biologic researches on, with Lambotte plate, 69; In war fractures, with exception of pseudarthroses, 244; With exposed plates, 405; Primary, in war surgery, 486
Otitis media, Paralysis of sixth cranial nerve associated with, 440
Otolaryngologic conditions, Diagnosis and treatment of, 516
Ovarian, Types of tubo-, suppuration and their treatment, 501
Ovary; corpus luteum, 159

Painful point in acute appendicitis, 394
Palatal breach, Closure of, after resection of superior maxillary, 91
Palate, Surgical correction of double harelip, alveolar cleft, and cleft of hard and soft, 89; Observations on treatment of cleft, 353
Pancreas, History analysis applied to surgical diseases of biliary tract and, 309
Pancreatic cyst, Report of case of, in association with tubercular kidney and intestinal complications, 310
Pancreatic reflux in diagnosis of duodenal ulcers, 476
Pancreatitis, Effect of prolonged bile drainage in cure of subacute and chronic, 51; Acute, 133
Paraffinated dressings, Clinical and histologic study of cicatrization of burns under, 63
Paralysis, General principles of splinting for, from nerve injuries; special application of principles in, of median and ulnar nerve, 247; Operative treatment of gunshot wounds of spine with grave, 405; Surgical treatment of progressive ulnar, 406; of sixth cranial nerve associated with otitis media, 440; Neurolysis of brachial plexus and peri-arterial sympathectomy of humeral in case of, of brachial plexus and causalgic syndrome due to war injury, 490
Paraplegia, Differential diagnosis between functional and organic, 246
Parasites, Clinical significance of irregular distribution of various cells and, in blood stream and production of abortive leukæmic changes and splenomegaly in macacus rhesus, 64
Paratyphoid insufficiency, Case of, 222
Parotid secretion, Resection of auriculotemporal nerve and its effect on, 374
Parotitis, Further study of experimental, 215
Pathogenesis, Connective-tissue theory of, of cancer, 491; Gas gangrene; determination of, and the serum treatment according to experimental action of specific sera, 493
Pathologic changes, Diagnostic value of study of, in vivo, 494
Pathologic lesions, Slight symptoms in gall-bladder disease with marked gross, 478
Pathologic study of bone substance, 480
Pathology, Surgical, of human prostate gland, 346; Of chronic metritis and chronic subinvolution, 419; And treatment of seminal vesiculitis and acute epididymitis, 512
Pediatric surgery at different ages, 457
Pediatrics, General anæsthesia by ether in, 372
Pelvic, Enterostomy and enterocolostomy in treatment of acute intestinal obstruction following, operations, 49; Symposium on, wounds, more especially those of the bladder and rectum, 235; Vaginal drainage in, cases, 252; Surgical aspects of, versus abdominal delivery, 506
Pelvic irruption of head of femur or central luxation of femur, 484
Pelvis, Distortion of, from posture, 319
Peptic ulcer, Fæcaloid vomiting due to jejunocolic fistula from, in old case of gastro-enterostomy, 475
Perforation in cancer of stomach, 388; Case of intestinal, by bullet; resection; suture; recovery, 390; Acute, of abdominal viscera, 397
Pericarditis, Meningococcic, with report of 12 cases, 385
Pericolitis, Surgical treatment of chronic constipation in, and ileopelvic megacolon, 308
Perineal prostatectomy, 262; Prostatectomy in a young adult for adenomatous prostate, 436
Perineural anæsthesia, Technique of, for radical surgery of maxillary sinus, 37
Peripheral nerve injury, Preliminary note on investigations upon 1,000 consecutive cases of, 406
Peritoneal, Use of Dakin's solution in suppurative conditions within the, cavity, 46; Sequelæ of abdominal war wounds, 386; Extra-, route in obstetrics, 422
Peritonitis, Syphilitic, as frequent cause of ascites in cirrhosis of liver, 229; Complete uterine rupture followed by, 338; Capparoni method in treatment of pleuritis and tubercular, 382
Peritonsillar abscesses, Medical treatment of, 175
Perodactylism, syndactylism, and cleft extremities in child, 399
Petrous bone, Clinical study of osteitis of apex of, and treatment of meningitis by lavage of meningeal cavities, 378
Pharyngeal abscess, Retro-, 442; Acute retro-, in children, 515
Phlyctenular disease of eye, Consideration of etiology of, 264
Phosphorous necrosis of jaws, Two cases of almost complete, 217
Physiologic action, Conditions which permit sterilization of war wounds by, 212; Of radiation, 408
Pituitary gland, Tumor of, and technique of operative approach, 119
Placenta prævia, Is cæsarean section justifiable in eclampsia and, 253; Limits of mixed or Braxton-Hicks version in treatment of, 422
Plasmoma of conjunctiva, 264
Plastic, Surgery, 34; Surgery of nose and ears, 37; Operation for restoration of eyelids, 461; Constructing a new nose, 462; Reconstruction of injured nose, 463; Reconstructive surgery; the problem of records, 485
Plastics, Nasal and paranasal, for war injuries, 298; Œsophageal, by free transplants of intestine, 472
Plate, Osteosynthesis with exposed, 405; Changes produced in growing bone after injury to epiphyseal cartilage, 461; Use and value of Lane, 485
Pleural, Treatment of purulent, effusions, 123; Early treatment of septic, effusions; complications of penetrating chest wounds, 227; Four new cases of total pleurectomy for, infection with pachypleuritis, 228; Study of, drainage, 302

Pleural cavities, Treatment of large, by disinfection pleurectomy, and pneumopexy, 467
Pleurectomy, Four new cases of total, for pleural infection with pachypleuritis, 228
Pleurisy, Pulmonary decortication in traumatic, following war wounds, 227; Treatment of purulent postgrippal, by anterior axillary drainage and intermittent irrigation, 302; Operative indications and prognosis in grippal purulent, 383; Sixteen cases of pleural fistula after purulent, disinfected by Dakin method and secondarily sutured, 467; Experimental and clinical, 467
Pleuritis, Capparoni method in treatment of, and tubercular peritonitis, 382
Pleuropulmonary wounds, Clinical and radioscopic researches on certain late sequelæ of, 124
Pneumonia, Streptococcus, and empyema; infection affecting 8 members of one family with 7 deaths, 303
Pneumopexy, Treatment of large pleural cavities by disinfection, pleurectomy and, 467
Pneumothorax, Two cases of artificial, 227; Pulmonary gangrene treated and cured by artificial, 469
Poliomyelitis, Etiology and treatment of acute, 312
Polya's method of anastomosing proximal gastric stump with jejunum, 389
Polycystic kidney, Case of fœtal, and its probable pathogenesis, 431
Postoperative, Aspects of prostatic surgery; methods of popular choice; pre- and, treatment, 169; Partial or incomplete intussusception as etiologic factor in untoward, sequelæ following appendectomy, 231; Treatment of abdominal cases, 295
Postpartum shock, 428
Pott's disease, Clinical value of the Albee operation in, 144
Pregnancy, Cancer of cervix complicating triplet, 73; Conservative surgery in operations upon fallopian tubes with reference to future, 75; Ovular theory in etiology of extra-uterine, 76; Toxæmias of, 77; Diagnosis of appendicitis complicating, 131; Diagnosis of ectopic, 161; Positive Wassermann reaction which changed to negative at termination of, 162; Red degeneration of fibroids during and following, 251; Angular, 253; Acute endocarditis in, 254; Study of various cases of toxæmia, of, 336; Renal complications of, from standpoint of urologist, 337; Report on effect of high carbohydrate feeding on nausea and vomiting of, 423; Pyelitis complicating, 425; Infection by Bacillus coli communis complicating, labor, and puerperium, 425; Maximum arterial tension in normal and pathologic, labor and puerperium, 504; Tuberculosis and, 504
Pregnant women, Employment of, in munition factories, 76
Prenatal hygiene, State and, 162
Primary suture, 114; Of craniocerebral wounds with suture of dura-mater, 460
Projectile, Extraction of intrapulmonary, 125; Localization and extraction of intrathoracic, by electro-vibrator method, 225; Operative indications for, in heart, 471; Extraction of, situated in wall of heart by median thoracolaparotomy, 472; Traveling by venous route and free in right ventricle of heart, 472
Prolapsus uteri, and sacropubic hernia, 419
Prostate, Question, 82; Tunneling of, in treatment of hypertrophied, 170; Surgical pathology of human, gland, 346; Silent, 346; Primary sarcoma of, with rapid growth following injury, 435; Pitfalls in diagnosis and treatment of senile hypertrophy of, with consideration from general practitioner's standpoint, 436; Total enucleation of, 512
Prostatectomy, 346, 436; Perineal, 262; Perineal, in young adult for adenomatous prostate, 436
Prostatic, Some aspects of, surgery; methods of popular choice; pre- and post-operative treatment, 169; Mechanism of bladder retention of, origin, 436; Surgery of, gland, 512
Prostatism, 170
Protein, Clinical report of non-specific, therapy in treatment of arthritis, 54
Pseudarthroses, Use of bone grafts in treatment of, 58; Surgical treatment of, of lower jaw following war wounds, 216; Treatment of, of war, 240; Osteosynthesis in war fractures, with exception of, 244; Following war wounds, 317
Pseudocalculus, Gastric, 387
Pseudocoxalgia following traumatic dislocation of hip in boy aged 4 years, 483
Pseudomyxoma of appendicular origin, 49
Pubiotomy, 254
Public provision for disabled soldier, Historical development of, 498
Puerperal, Treatment of, blood-stream infections by means of arsenobenzol, 78; Uterine gangrene, 163; bacteriology of blood in, infection, 339
Puerperium, Maximum arterial tension in normal and pathological pregnancy, labor and, 504
Pulmonary, Extraction of intra-, projectiles, 125; Fat embolism and its relation to traumatic shock, 248; New hæmostatic apparatus especially applicable to, hæmostasis, 459; Gangrene treated and cured by artificial pneumothorax, 469
Purulent pleurisies, Operative indications and prognosis in grippal, 383
Pus, Chemical constitution of, 150; Pyoculture and tryptic reaction, 329
Pyelitis, Bacteriologic study of 70 cases of urinary infection with special reference to, 167; Complicating pregnancy, 425
Pyelonephritis, 257
Pyloric stricture, Transient and alimentary glycosuria after gastro-enterostomy for, which was of ulcerous origin, 129
Pylorus, Twenty-six cases of hypertrophic stenosis of, in private practice; with operation by Rammstedt method, 389
Pyuria, Acute and subacute unilateral infectious nephritis without, from affected side, 507

RADIATION, Localization of physiologic effects of, within cell, 322; Physiologic action of, 408
Radiography, Second series of notes on, of gall-bladder, 234; Foreign body in right bronchus; illustrating value of thorough, 383
Radiologic examination, Value of, in biliary lithiasis, 478
Radioscopic, Clinical and, researches on certain late sequelæ of pleuropulmonary wounds, 124; Primary extraction of intracerebral projectiles by forceps under, control; operative indications; technique; results, 379
Radiosurgical aeroplane "Aerochir," 156
Radiotherapeutic method in treatment of uterine hæmorrhage, 158
Radio-ulner, Bilateral congenital, synostosis, 134
Radium, Influence of, on cancer tissues, 62; Treatment of certain hæmorrhages of uterus with, and roentgen rays, 73; Carcinoma of epiglottis and root of tongue removed by Simpson needles; description of needle-placing instrument, 91; Influence of heat and, upon induced immunity against transplanted animal tu-

mors, 148; Phases of action of, with special reference to hæmatopoietic system, 151; Two hundred and ten fibroid tumors treated by, 158; Use of heat and, in treatment of cancer of jaws and cheeks, 217; Therapy in hyperthyroidism, with observations of endocrinous system, 221; Glioma of retina, with report of 3 cases treated with, 264; Comparative value of, and roentgen radiation, 333; Technique of after-treatment of war injuries by, 457
Radium therapy, Present status of, 496
Radium treatment, Of epithelioma of lower lip, 374; Splenectomy following, for myelocytic leukæmia, 396; Notes on, 496
Rammstedt method, Twenty-six cases of hypertrophic stenosis of pylorus in private practice with operation by, 389
Reactions in gas gangrene, 413
Reconstruction, Of common bile-duct, 132; Total, of upper lip, 374; Orthopedic, on hand and forearm, 404; Problem of records in, surgery, 485
Records, Reconstructive surgery; problem of, 485
Rectum, Report of foreign body in, simulating incomplete abortion, 233; Symposium on pelvic wounds; more especially those of bladder and, 235; Examination of, and anus, 394
Recurrence, Prevention of, of symptoms following operations for gall-stones, 396; Of stone in kidney after operation, 508
Regeneration, Bone, in adult after surgical excision, 487
Renal, Studies of, function during and immediately following acute infectious diseases, 81; Complications of pregnancy from standpoint of urologist, 337; And ureteral infection with gonococcus, 429; Absorption from pelvis in hydronephrosis due to permanent and complete occlusion of ureter, 430; Recurrent, crises, 508; Hæmaturia, 508
Resection, Long, of small bowel, 130; Of auriculotemporal nerve and its effect on parotid secretion, 374; In case of intestinal perforation by bullet followed by recovery, 390; Of cæcum and ascending colon, 477
Result, Remote, of tonsillectomy in young child, 441
Retention, Mechanism of bladder, of prostatic origin, 436
Retina, Surgical treatment of detachment of, 172; Glioma of, with report of 3 cases which were treated with radium, 264
Retropharyngeal abscess, 442; in infants, 89; Acute, in children, 515
Rheumatoid arthritis, 239
Rib, Surgical considerations on cervical, 119
Roentgen, Importance of complete, study of gastrointestinal tract and gall-bladder in all obscure abdominal cases, 311; Comparative value of radium and, radiation, 333
Roentgenograms, Source of error in interpretation of, of skull, 376; Stereo-, of injected lung as aid to study of lung architecture, 468
Roentgenographic studies of tissues involved in chronic mouth infections, 353
Roentgenologic, Brief review of, pathology of stomach, 128; Diagnosis of cholecystitis and adhesions, 479; Need of more frequent, examinations in head injuries, 495
Roentgenology, Clinical observations in military, 71
Roentgenotherapy, Tuberculous adenitis and treatment by, 41
Roentgen-ray, Treatment of certain hæmorrhages of uterus with radium and, 73; Observations of mastoid structure as revealed by, examination, 514
Route, Wide and economic, of approach to cervicomediastinal space, 124
Rupture, Of uterus, 163; Of gravid uterus and extra-uterine pregnancy, 442; Of symphysis, 484; Traumatic, of urinary bladder, 509
Ruptured internal lateral ligament of knee, Operative treatment of, 402

SACCHAROSE injections, 384
Sacro-iliac joint, Symptoms attributed to lesions of, 238; Demonstrable luxation of, 317
Sacrum, Resection of, for chronic osteitis following wound of sacral region, 246
Salivary fistulæ, 375
Saphena magna, Case of complete hypospadias; free transplant of vena, as urethral substitute, 435
Saphenous vein, Grafts of, into urethra, 434
Sarcoma, Of heart, 45; Primary, of right faucial tonsil operated upon by interocervical route; recovery, 88; Multiple primary malignant tumors; report of case of carcinoma and, in same individual, 147; Of brain, 220; Hæmorrhagic osteomyelitis and, in bone, 312; Primary, of prostate with rapid growth following injury, 435; Ophthalmoscopic conditions simulating, of choroid, 439
Sarcomatous development in depth of right thigh in trajectory of recent wound, 313
Scalp, Hæmangioma of, 116
Scars, Use of ionization in treatment of certain types of facial, 461
Sciatica, Radical treatment of, by lumbar anæsthesia, 61; Of skeletal origin due to vertebral anomalies and syndrome of Bertolotti, 320
Scleral trephining, Postciliary, for acute glaucoma, 350
Scopolamin-morphin narcosis or twilight sleep, 505
Section, Complete anatomic, of dorsal cord; suture of cord; survival for eight months, 489
Seminal, Vesiculography, 169; Human, vesicles at birth, 345; Vesiculotomy in treatment of gonorrhœal rheumatism, 345; Pathology and treatment of, vesiculitis and acute epididymitis, 512
Senile hypertrophy of prostate, Pitfalls in diagnosis and treatment of, considered from general practitioner's standpoint, 436
Sepsis, Treatment of, by zinc ionization, 370
Septic wounds, Treatment of extensive, 370
Septicæmia, Experimental findings on significance of, 413
Sequelæ, Surgical complications and, of influenza, 490
Sequestra in war injuries, 237
Sera, Treatment of gas gangrene by anti-gangrenous, 65; Effects of intravenous injections of artificial, in hæmorrhagic animals, 326; Antigangrenous serotherapy by injection of antibellonensis and antivibrion-septic, 326
Serologic localization of organic brain lesions, 40
Serotherapy, Of gangrene of war wounds, 152; First results of systematic trials of antigangrenous preventive, 325; Antigangrenous, by injection of antibellonensis and antivibrion-septic sera, 326
Serum, Use of compound artificial, in treatment of shock, 63; Influence of immune, upon reactions about transplanted tissues, 151; New methods for blood transfusion and, therapy, 327
Serum treatment, Gas gangrene; determination of pathogenesis and, according to experimental action of specific sera, 493
Seton wound of primary carotid; complete section of internal jugular; ligature and recovery without hemiplegia, 464

Shock, Use of compound artificial serum in treatment of, 63; 148; Studies on experimental surgical, 149; Nature and treatment of surgical, 150; Further experimental study of surgical, 248; Pulmonary fat embolism and its relation to traumatic, 248; Nature of surgical, and Henderson's theory of acapnia, 324; Untransportable cases of shock in army corps during battles of May 27 and July 15, 1918, 409; Postpartum, 428
Shoulder, Loose osteocartilaginous bodies in, 313; "No splint" treatment of fractures in humerus, elbow, and about, 315
Sinus, Superior longitudinal, in infants; value in transfusion and for rapid medication; adaptability for procuring blood for diagnosis, 117; New apparatus for puncture of superior longitudinal, 298; Spontaneous recovery from lateral, thrombosis, 514
Sinus disease, Three cases of, 515
Sinus surgery, Blood-clot dressing in frontal, 441
Sinuses, Frequent but neglected evidences of syphilis from side of nose, accessory, and ear, 441; Bitemporal hemianopsia due to acute suppuration of posterior nasal, 515
Sinusitis, Present status of operative treatment of chronic frontal, 353
Skeletal alignment, Effect of faulty, upon eyes, 439
Skin grafting, New instrument used for, in radical mastoid cavity, 440
Skull, Source of error in interpretation of roentgenograms of, 376; Treatment of compound fracture of, with open dura, 377
Sodium citrate, Reaction following blood transfusion by, method, 249; Transfusions; a study of 100 cases, 410
Soldier, Historical development of public provision for disabled, 498
Sound, Flexible metallic ureteral, with filiform guide, 84
Spinal, Anæsthesia with novocain and with stovain, 213; Treatment of, war injuries, 245; Fractures of, column with and without cord injury, 245; Anæsthesia, 372
Spinal route, General anæsthesia by, with novocain, 372
Spine, Symptomatology and diagnosis of wounds of, and cord, 60; Osteomyelitis of, 61; Operative treatment of gunshot wounds of, with grave paralyses, 405; Laminectomies in war traumatisms, 490
Spirochætæ in walls of stomach, 387
Splenectomy, Surgical treatment of certain diseases by, 133; Following radium treatment for myelocytic leukæmia, 396
Splenomegaly, Clinical significance of irregular distribution of various cells and parasites in blood stream and production of abortive leukæmic changes and, in macacus rhesus, 64; Gaucher type of, with report of a case, 409
Splint, Triangle, in treatment of compound fractures of humerus, 298; Myological principles; a new ulner, 373
Spontaneous evolution, Fœtal, 426
Statistical, Study of simple and toxic goiter at Jefferson Barracks, Mo., 465; Clinico-, contribution to study of cineplastics, 488
Stenosis, Twenty-six cases of hypertrophic, of pylorus in private practice, with operation by Rammstedt method, 389; Supercæcal, due to abnormal conditions of appendix, 393; Treatment of laryngeal, by corking tracheotomic cannula, 516
Stereoroentgenograms of injected lung as aid to study of lung architecture, 468
Sterility due to retrodisplacement of uterus; non-operative and operative treatment, 334
Sterilization, Secondary and late, of infected war wounds by Carrel method, 372
Stillbirth due to infection, 338
Stokes-Gritti amputation, Modification of, 60
Stomach, End-results of gastro-enterostomy in non-complicated, ulcer, 128; Brief review of roentgenologic pathology of, 128; Studies in fractional estimation of, contents, 305; Spirochætæ found in walls of, 387; Perforation in cancer of, 388; New diagnostic sign of, and intestinal ulcer, 388; Surgery of gastric ulcer; clinical lecture, 475
Stones, Recurrence of, in kidney, 79; Prevention of recurrence of symptoms following operations for gall-, 396; Recurrence of, in kidney after operation, 508
Stovain, Spinal anæsthesia with novocain and with, 213
Streptococcal wounds, Study of, 113
Streptococcus, Studies in bovine mastitis; non-hæmolytic, in inflammation of udder, 70; Epidemic, infection of nose and throat clinically considered, 175; Pneumonia and empyema, 303; Study on etiology of cholecystitis and its production by injection of, 478; In first phases of evolution of war wounds, 500
Stricture, Operation for reconstruction of urethra in cases of severe or impermeable, 82; Brief report of infant with congenital, of duodenum; operation; death, 231; Technical errors in operative treatment of urethral, 261; Treatment of lye, of œsophagus, 304; Acquired, of lower end of ureter, 342
Stumps, On secondary treatment of war amputation, 488
Stupor, Traumatic arterial, 493
Subdural, Histogenesis and pathology of, hæmorrhages, 220
Subinvolution, Pathology of chronic metritis and chronic, 419
Subphrenic, Surgical aspects of right, abscess, 126; Abscess in children, 491
Suction extraction, Barraquer, of cataract, 513
Suppuration, Types of tubo-ovarian, and their treatment, 501
Suppurative, Aseptic puriform meningeal reactions in the course of, unilateral, ventricular ependymitis, 460
Surgery, Amputation of thigh in war, 60; Emergency, 325; Of diabetic patients, 407; Teaching of, 497; Teaching, by moving picture, 497
Surgical, Heart risk in, operations, 63; Sequelæ of grippe, 124; Modification of civil, practices suggested by surgery of war, 369; Conditions in great war, 499
Surveys, Report on Cleveland and Elyria cripple, 489
Suture, Direct nerve, in nerve injury, 62; Primary and delayed primary, in treatment of war fractures, 72; Primary, 114; Indications and technique of secondary, 213; Primary, of soft parts in diaphyseal fractures, 315; Method of overcoming adherence of tendons after, 317; Secondary, in war surgery, 371
Sympathectomy, Neurolysis of brachial plexus and periarterial, of humeral in case of paralysis of brachial plexus and causalgic syndrome due to war injury, 490
Symphysis, Rupture of, 484
Syndactylism, perodactylism, and cleft extremities in child, 399
Synostosis, Bilateral congenital radio-ulner, 134
Syphilis, Of stomach, 47; Of thyroid gland; Report of case, 301; Remarks on relationship of, to abortion, miscarriage, and fœtal abnormalities, 336; Frequent but neglected evidences of, from side of nose, accessory sinuses, and ear, 441
Syphilitic peritonitis as frequent cause of ascites in cirrhosis of liver, 229

TARSAL torsion in weight bearing, 399
Teaching, Surgery by moving picture, 497; Of surgery, 497

Technique, Tumor of pituitary gland; Of operative approach, 119; Indications and, of secondary suture, 213; Recent studies in anatomy and physiology of tendons; their application to, of tendon operations 239; Surgical, in orthopedic surgery, 319; New, of heart massage with case of resuscitation, 469
Temporal, Osteosclerosis of, bone in chronic suppuration, 352
Tendon sheath, Giant cell growth of bone and, 238
Tendons, Recent studies in anatomy and physiology of; their application to technique of tendon operations, 239; Method of overcoming adherence of, after suturing, 317
Teratomatous growth, Recurrent, of trachea, 125
Testicular neuralgias, Etiology and treatment of, caused by adhesive vaginalitis, 262
Testis, Transverse ectopy of, with masculine uterus, 344
Tetanus, Localized, of limbs, 413
Thigh, Fracture of, treated with modified Thomas splint, 400
Thomas splint, Treatment of thigh fracture with modified, 400
Thoracic, Localization and extraction of intra-, projectiles by electro-vibrator method, 225; Re-animation of heart by massage by, route, 470
Thoracolaparotomy, Extraction of projectile in wall of heart by median, 472
Thorax, Surgical treatment of penetrating wounds of, 226; Diagnosis of acute infection in, 381; Chylo-, 466; Chondroma of, 466
Throat, Epidemic streptococcus infection of nose and, clinically considered, 175; Cancer of oral cavity, jaws, and, treated by electrothermic methods or in combination with surgery, roentgen ray, and radium, 266
Thrombosis, Spontaneous recovery from lateral sinus, 514
Thymus tumor associated with acute lymphatic leukæmia, 44
Thymus gland, Effect of injection on growth and behavior of guinea-pig, 494
Thyroid, Principles of, surgery, 42; Studies in, therapy; effects of therapy of, and effects of the hormone of, as determined by clinical, metabolic and dietetic investigation, 43; Multiple transplantations of, and lymphocytic reaction, 120; Cancer of, gland, 221; Syngenesioplastic transplantation of, in guinea-pig, 222; Acute necrosis of, gland, 300; Syphilis of, gland; report of case, 301; Traumatic lesions of, and surgical treatment, 465
Tibia, Case of congenital deformity of hands, supernumerary toes, and absence of, 53; Case of cuneiform fracture of upper extremity of, 55
Tibial bone graft, 403
Toes, Case of congenital deformity of hands, supernumerary, and absence of tibiæ, 53
Tongue, Carcinoma of epiglottis and root of, removed by Simpson radium needles, with description of needle-placing instrument, 91; Observations on laryngotomy and excisions of, 443; Cancer of, 443
Tonsil, Primary sarcoma of right faucial, operated upon by laterocervical route; recovery, 88; Susceptibility to infection manifested by remains of incompletely removed, 88
Tonsillar infections, Epidemiology of acute appendicitis in relation to acute nasal and, 49
Tonsillectomy, Anterior dislocation of atlas following, 377; Remote result of, in young child, 441
Torsion, Tarsal, in weight bearing, 399; Of appendices epiploicæ, 477
Torticollis, Chronic and its operative treatment, 220
Toxæmias, Of pregnancy, 77; Study of various cases of pregnancy, 336
Toxic, Statistical study of simple and, goiter at Jefferson Barracks, Mo., 465
Trachea, Recurrent teratomatous growth of, 125; New diagnostic sign of foreign body in, or bronchi; asthmatoid wheeze, 228
Tracheotomic cannula, Treatment of laryngeal stenosis by corking, 516
Transfusion, Superior longitudinal sinus in infants; value in, and for rapid medication; adaptability for procuring blood for diagnosis, 117; Of citrated blood, 152; Agote method of blood, 152; Reaction following blood, by sodium citrate method, 249; Symposium on blood, 327; New methods for blood, and serum therapy, 327; Sodium citrate, 410; Blood, and application of recent methods in treatment of obstetrical hæmorrhage, 411
Transplantation, Comparison of hetero-, and homo-, 68; Analysis of behavior of organs after, in rat and of power of resistance of constituents of various organs, 331; Complete hypospadias and free, of vena saphena magna as urethral substitute, 435; Œsophageal plastics by free, of intestine, 472; Study of method of increasing osteogenetic power of free bone transplant in bone, 487
Transplanted tissues, Influence of immune serum upon reactions about, 151
Traumatic, Obliteration of arteries, 412; Aneurism of external iliac artery, 412; Lesions of thyroid gland and surgical treatment, 465; Arterial stupor, 493; Rupture of urinary bladder, 509
Traumatisms of posterior urethra observed at base hospitals, 511
Trepanation in newborn, 219
Troops, Foot problems and treatment with unseasoned, 54
Tryptic, Researches on pus; Pyoculture and, reaction, 329
Tubercle, Consideration of methods for demonstrating, bacilli in urine, 348
Tuberculosis, Aseptic resection of right colon for constipation, or cancer, 50; Treatment of vertebral, by fusion operation, 320; Treatment of genital, in male, 347; Genito-urinary, in children, 348; And pregnancy, 504
Tuberculous, Adenitis and its treatment by roentgenotherapy, 41; Prevention versus treatment in, laryngitis, 88; Bacteriology of, kidneys, 164
Tubo-ovarian, Types of, suppuration and their treatment, 501
Tumors, Hypophyseal, through intradural approach, 41; Multiple primary malignant; report of case of carcinoma and sarcoma in same individual, 147; Influence of heat and radium upon induced immunity against transplanted animal, 148; Fibroid, of uterus, 157; Two hundred and ten fibroid, treated by radium, 158; Treatment of, of upper jaw with cautery, 216; Treatment of, of superior maxilla, 218; Fluctuations in growth energy of malignant, in man, with special reference to spontaneous recession, 247; Of large intestine, 308; Atrophy of, produced by means of blastin-free diet, 322; Report of two orbital, 350; Investigation of power of mesodermal derivatives to immunize mice against transplantable, 407; Benign intradural, of optic nerve and their surgical treatment, 513
Twilight sleep, Local anæsthesia and, in surgery of exophthalmic goiter, 380; Scopolamin-morphin narcosis or, 505

UDDER, Studies in bovine mastitis; non-hæmolytic streptococci in inflammation of, 70.
Ulcer, Observations on diagnosis and treatment of gastric and duodenal, 47; Elusive, of bladder; further notes on rare type of bladder, 81; gastroduodenal, and chronic appendicitis, 127; End-results of gastroenterostomy in non-complicated stomach, 128; Use of Unna's dressing in treatment of leg, 314; Results of surgical treatment in gastric and duodenal, 388; New diagnostic sign of stomach and intestinal, 388; Surgery of gastric, 475
Ulceration, Secondary jejunal and gastrojejunal, 390; Pancreatic reflux in diagnosis of duodenal, 476
Ulnar, General principles of splinting for paralysis from nerve injuries; special application of principles in median and, nerve paralyses, 247; Myological principles; a new, splint, 373; Surgical treatment of progressive, paralysis, 406
Unna's dressing, Use of, in treatment of leg ulcers, 314
Urea, Diagnostic and prognostic value of blood, in urology, 437
Ureter, Treatment of war traumatisms of kidney and of, at base hospitals, 165; Kidney and, abnormalities, 166; Stenosis of, caused by appendicitis, 342; Acquired stricture of lower end of, 342; Absorption from renal pelvis in hydronephrosis due to permanent and complete occlusion of, 430
Ureteral, Flexible metallic, sound with filiform guide, 84; Repair of, defect by plastic operation on bladder wall, 343; Renal and, infection with gonococcus, 429; Problems of, surgery in gynecology, 503
Uretero-intestinal, Remote effects of absorption of urine from colon; case of traumatic unilateral, anastomosis, 432
Ureterovesical, Effect on kidney of, anastomosis; experimental and clinical report, 341
Urethra, Operation for reconstruction of, in cases of severe or impermeable stricture, 82; Absorption of drugs and poisons from bladder and, and absorption of various alkaloids, antiseptics, local anæsthetics and salts, 84; Diverticula of female, 343; Graft of saphenous vein into, 434; Traumatisms of posterior, observed at base hospital, 511
Urethral, Operative treatment of, fistula, 168; Autoplastic methods applicable to treatment of, fistulæ following war wounds, 168; Technical errors in operative treatment of, stricture, 261; Hypogastric deviation of urine in treatment of, wounds, 344; Case of complete hypospadias; free transplant of vena saphena magna as, substitute, 435
Urinary, Calculi in infancy, 84; Bacteriological study of, infection with special reference to pyelitis, 167; Some points in management of, calculi, 340
Urine, Extravasation of, 347; Consideration of methods for demonstrating tubercle bacilli in, 348; Remote effects of absorption of, from colon; case of traumatic unilateral ureterointestinal anastomosis, 432
Urologic, Plea for complete, diagnosis at one sitting, 83; Cases of kidney calculus observed at, center, 257
Urologist, Renal complications of pregnancy from standpoint of, 337
Urology, Diagnostic and prognostic value of blood urea in, 437
Uterine, Inertia, 77; General consideration of, cancer, with special reference to diagnosis, 157; Radiotherapeutic methods in treatment of, hæmorrhage, 158; Puerperal, gangrene, 163; Corrective treatment of congenital cervical stenosis and, anteflexion with Iribarne apparatus, 251; Surgical cure of, prolapse, 251; Complete, rupture; peritonitis; suture and drainage; recovery, 338; Transverse cuneiform excision of, fundus by Beuttner's method, 420
Utero-abdominal abortion, 161
Uterus, Treatment of certain hæmorrhages of, with radium and roentgen rays, 73; Study of 1,500 selective cases of myomata of, operated upon at Woman's Hospital, 1910 to 1917, 73; Pathogenesis and further growth of carcinoma of, in relation to clinical symptoms and early diagnosis, 157; Observation on fibroid tumors of, 157; Final results of X-ray treatment of fibroids of, 157; Rupture of, 163; Sterility due to retrodisplacement of, and its non-operative treatment, 334; Transverse ectopy of testis with masculine, 344; Sacropubic hernia and prolapsus, 419; Rupture of gravid, and extra-uterine pregnancy, 422; Abdominal evacuation of pregnant, before viability, 423; New operation for, bicornate, 501
Uveal, Diagnosis of inflammation of, tract of systemic origin, 85

VACCINATION, Antistreptococcus, of war wounds by lipovaccine and ether-sensitized vaccine, 492
Vagina, Radical treatment of genital prolapse in women by suture of levators and urogenital supports above, 252; Artificial, and its construction; brief foreword on anomalies of genital tract, 501
Vaginal, Control of hæmorrhage in, hysterectomy, 74; Drainage in pelvic cases, 252
Vaginalitis, Etiology and treatment of testicular neuralgias caused by adhesive, 262
Variation in distribution of nervus abducens in man, 376
Varicocele and its treatment, 68
Vascular, trunk, Circulatory restoration in limbs after ligature of principle, 67
Veins, Catheterization of arteries and, 329
Venous, Effects of intra-, injections of artificial sera in hæmorrhagic animals, 326; Projectile traveling by, route and free in right ventricle of heart, 472
Ventricles, Extirpation of choroid plexus of lateral, in communicating hydrocephalus, 299; Fluoroscopy of cerebral, 461
Version, Limits of mixed or Braxton-Hicks, in treatment of placenta prævia, 422
Vertebral, Treatment of, tuberculosis by fusion operation; report of 210 cases, 320; Sciatica of skeletal origin due to, anomalies and syndrome of Bertolotti, 320
Vesical, Calculus impacted in, diverticulum removed by high frequency cauterization, 167; Calculi in childhood, 342; Excision of, diverticula after intravesical invagination by suction; new method, 511
Vesicles, Human seminal, at birth, 345
Vesiculography, Seminal, 169
Viscera, Acute perforations of abdominal, 397
Visual, Righthandedness and its relation to, conditions, 86
Volvulus, Adenoma of small intestine in infant, with resulting, 130

WAR, Relative values of principles of extension, suspension and mobility exemplified in both civil and, practice by Hodgen wire cradle extension suspension splint, 57; Surgical aspects of extremities in, 59; Amputation of thigh in, surgery, 60; Primary and delayed suture in treatment of, fractures, 72; Prevention of deformities in time of peace and, 78; Treatment of wounds of genital organs in, 83; Carrel treatment of, wounds in 1918, 114; Surgical treatment of, wounds, 115; Osteitis of, 134; Fractures in, 139; Vicious scars of, wounds and surgical orthopedic treatment, 141; Bone grafting in, surgery, 141;

Serotherapy of gangrene of, wounds, 152; Symposium on, surgery, 154; Treatment of, traumatisms of kidney and ureter at base hospitals, 165; Autoplastic methods applicable to treatment of urethral fistulæ following, wounds, 168; Analysis and results of methods of primary, secondary and late treatment of, wounds, 211; Conditions which permit sterilization of, wounds by physiologic action, 212; Surgical treatment of pseudarthroses of lower jaw following, wounds, 216; Pulmonary decortication in traumatic pleurisies following, wounds, 227; Sequestra in, injuries, 237; Treatment of pseudarthroses of, 240; Fractures and articular, injuries of lower limbs, 243; Osteosynthesis in, fractures, with exception of pseudarthroses, 244; Treatment of spinal, injuries, 245; Progress of cicatrization of, wounds and agents capable of influencing it, 296; Nasal and paranasal plastics for, injuries, 298; Pseudarthroses following, wounds, 317; Wound intoxication; nitrogenous disintegration of traumatized tissues, 324; Etiology of gaseous and non-gaseous gangrenous infections of, wounds, 330; Modification of civil surgical practices suggested by surgery of, 369; Secondary sutures in, wounds, 371; Field of local anæsthesia in, hospital, 373; Conclusions adopted at Fifth Interallied Surgical Conference for Study of, Wounds, 416; Technique of after-treatment of, injuries by radium, 457; Strangulated diaphragmatic hernia consecutive to, wounds, 473; Primary osteosynthesis in, surgery, 486; Secondary treatment of, amputation stumps, 488; Laminectomies in, traumatisms, 490; Antistreptococcus vaccination of, wounds by lipovaccine and ether-sensitized vaccine, 492; Secondary hæmorrhages as observed in, surgery, 492; Surgical conditions in the great, 499; Streptococcus in first phases of evolution of, wounds, 500

Wassermann, Positive, reaction which changed to negative at termination of pregnancy, 162

Weight bearing, Tarsal torsion in, 399

Workman's Compensation Law, Back injuries and their relation to, 496

Wounded soldiers, Blood volume in, and related blood changes after hæmorrhage, 493; Use of forced fluids by alimentary tract in restoration of blood volume in, after hæmorrhage, 493

Wounds, Bed and appliances for gunshot, of femur and back, 36; Methods of control of fragments in gunshot, of jaws, 36; Symptoms, treatment and prognosis of brain, based on 56 cases, 40; Penetrating abdominal, 45; Restoration of function after penetrating gunshot, of knee-joint, 55; Conservative treatment of knee-, 58; Symptomatology and diagnosis of, of spine and cord, 60; Pathology of peripheral nerves in gunshot, 62; Laws of cicatrization of cutaneous, 64; Suggestions for treatment of septic, 71; Calculi in immobilized and well-fed patients with genito-urinary infected, 79; Treatment of, of genital organs in warfare, 83; Presence of diphtheria and diphtheroid bacilli in open, 113; Study of streptococcal, 113; Carrel treatment of war, in 1918, 114; Surgical treatment of war, 115; Clinical and radioscopic researches on certain late sequelæ of pleuropulmonary, 124; Gunshot, of knee-joint as seen at base hospital, 135; Vicious scars of war, and their surgical orthopedic treatment, 141; Experimental research on protection of nerve, 146; Serotherapy of gangrene of war, 152; Autoplastic methods applicable to treatment of urethral fistulæ following war, 168; Treatment of gunshot, of face accompanied by extensive destruction of lower lip and mandible, 176; Analysis and results of methods of primary, secondary and late treatment of war, 211; Treatment of, 212; Conditions which permit sterilization of war, by physiologic action, 212; Notes on 161 cases of gunshot, of head, 214; Surgical treatment of pseudarthroses of lower jaw following war, 216; Penetrating of chest, 225; After-effects of, of chest and their treatment, 225; Surgical treatment of penetrating, of thorax, 226; Pulmonary decortication in traumatic pleurisies following war, 227; Early treatment of septic pleural effusions; complications of penetrating chest, 227; Symposium on pelvic, more especially those of bladder and rectum, 235; Affections of large joints due to gunshot, and their late results and treatment, 240; Results of primary excision for, of elbow-joint, 243; Resection of sacrum for chronic osteitis following, of sacral region, 246; Classification of disturbances of sphincteric control resulting from, and contusions of lumbosacral region, 261; Prognosis and treatment of ocular, with penetration of foreign bodies, 264; Treatment of 420 infected, under battle conditions arriving on average of fifty-eight and one-third hours after injury, without previous surgical treatment, 295; Carrel-Dakin treatment at Oxford; observation of Carrel-Dakin method of treating chronic, in orthopedic center in England, 295; Progress of cicatrization of war, and agents capable of influencing it, 296; Value of Carrel method applied to suppurating, at base hospital, 296; Study of 450 cases of, of chest, with special reference to new method of treatment for infected hæmothorax, 301; Penetrating gunshot abdominal, 311; Sarcomatous development in depth of right thigh in trajectory of recent, 313; Pseudarthroses following war, 317; Surgical intervention in gunshot, of nerves, 322; War, intoxication; nitrogenous disintegration of traumatized tissues, 324; Etiology of gaseous and non-gaseous gangrenous infections of war, 330; Hypogastric deviation of urine in treatment of urethral, 344; Liquid-tight closure and treatment of infected, 370; Treatment of extensive septic, 370; Secondary sutures in war, 371; Peritoneal sequelæ of abdominal war, 388; Treatment of, of liver; report of 26 cases, 394; Remarks on treatment of abdominal, at front, 398; Gunshot, of spongy bone tissue, 399; Conclusions adopted at Fifth Interallied Surgical Conference for Study of War, 416; Results of early treatment of ocular, 439; Gunshot war, of maxillary sinus, 463; Diphtheroid infection of, 494; Streptococcus in first phases of evolution of war, 500

X-RAY, Value of, in treatment of malignant disease of breast, 122; Few facts in regard to modern, therapy, 153; Final results of, treatment of fibroids of uterus, 157; Personal case of appendicular calculi revealed by, 232; Diagnosis of appendicitis by, 393; Studies on, effects; destructive action on blood cells, 414; Studies on, effects; stimulative action on lymphocytes, 415; Diagnosis of lung disease, 495

ZINC, Treatment of sepsis by, ionization, 370

INDEX OF BIBLIOGRAPHY

GENERAL SURGERY

Surgical Technique

Operative Surgery and Technique, 92, 267, 355, 444, 457

Aseptic and Antiseptic Surgery, 92, 177, 267, 355, 444

Anæsthetics, 92, 177, 267, 355, 444, 458
General. Local. General subjects on anæsthetics

Surgical Instruments and Apparatus, 92, 177, 267, 355, 444, 459

Surgery of the Head and Neck

Head, 92, 178, 268, 356, 445, 460
Scalp. Skin. Nerves. Glands. Skull and Maxilla. Meninges. Brain, cerebrum, cerebellum, hypophysis

Neck, 93, 178, 268, 356, 445, 464
Skin. Glands, Muscles and blood-vessels. Bones. Thyroid. Goiter, Basedow's disease, Grave's disease. Parathyroid. Retropharyngeal conditions

Surgery of the Chest

Chest wall and Breast, 93, 179, 269, 356, 446, 466
Breast. Incisions, wounds, injuries, etc. Bones. Pleura. Mediastinum. Thymus

Trachea and Lungs, 94, 179, 269, 357, 446, 468
Trachea. Bronchi. Lungs

Heart and Vascular System, 94, 179, 269, 357, 446, 469
Heart. Pericardium. Aorta

Pharynx and Œsophagus, 94, 180, 269, 357, 446, 472

Surgery of the Abdomen

Abdominal Wall and Peritoneum, 94, 180, 270, 357, 447, 473
Incisions and drainage. Tumors. Retro- and pro-peritoneal conditions. Peritoneum. Diaphragm. Hernia. Omentum. Mesentery. Urachus. Diverticula

Gastro-Intestinal Tract, 94, 180, 270, 357, 447, 474
Stomach and pylorus. Duodenum. Small intestines. Cæcum. Appendix. Colon. Rectum. Anus
Secretions of, diagnosis, radiology, injuries, hæmorrhages, vomiting, inflammations, obstructions, hernia, ulcer, tumor, surgery, general therapy

Liver, Pancreas, and Spleen, 95, 181, 271, 358, 448, 478

Miscellaneous, 95, 181, 271, 358, 448, 480

Surgery of the Extremities

Diseases of Bones, Joints, Muscles, Tendons. General Conditions Commonly Found in the Extremities, 95, 181, 271, 359, 448, 480

Fractures and Dislocations, 96, 182, 272, 359, 449, 483

Surgery of the Bones, Joints, Etc., 97, 182, 272, 360, 449, 485

Orthopedics in General, 97, 183, 273, 360, 450, 489

Surgery of the Spinal Column and Cord

Diseases and Deformities of the Spine, 97, 183, 273, 360, 450, 489
Inflammations, tumors, fractures, surgery Cord

Surgery of the Nervous System

Nervous System, 97, 183, 273, 361, 450, 490
Inflammations, tumors, surgery

Miscellaneous

Clinical Entities — Tumors, Ulcers, Abscesses, Etc., 98, 184, 273, 361, 451, 490
Tumors. Ulcers. Inflammations. Shock. Tissue transplantation. Surgical diseases

Sera, Vaccines, and Ferments, 98, 184, 274, 361, 451, 492
Serum. Vaccine. Ferments. Immunization. Anaphylaxis

Blood, 98, 185, 274, 361, 452, 492
Blood picture in general. Hæmorrhage. Coagulation. Thrombosis. Embolism. Transfusion.

Blood and Lymph Vessels, 99, 185, 274, 362, 452, 493
Aneurisms. Vessel suture and ligation. Lymph vessels and glands

Poisons, 99, 185, 274, 362, 452, 493
Bacterial. Chemical

Surgical Diagnosis, Pathology, and Therapeutics, 99, 186, 275, 362, 452, 494

Experimental Surgery and Surgical Anatomy, 186, 275, 362, 452, 494

Roentgenology and Radium Therapy, 99, 186, 275, 362, 453, 495
X-ray. Radium. Electrical treatment. Heliotherapy

Industrial Surgery, 496.

Hospital, Medicolegal, and Medical Education, 99, 186, 275, 363, 453, 497

Military Surgery, 100, 186, 276, 363, 453, 498

GYNECOLOGY

Uterus, 100, 187, 276, 363, 453, 501
Tumors. Hæmorrhage. Inflammations. Malformations. Displacements. Injuries. Surgery

Adnexal and Periuterine Conditions, 101, 188, 276, 364, 454, 501
Ovaries. Tubes. Ligaments. Pelvic conditions in general

External Genitalia, 101, 188, 277, 364, 501
Vagina. Vulva. Urethra. Clitoris.

Miscellaneous, 101, 188, 277, 364, 454, 503

OBSTETRICS

Pregnancy and Its Complications, 101, 188, 277, 364, 454, 504
Pregnancy. Eclampsia and toxæmias. Cæsarean section. Abortion. Complications

Labor and Its Complications, 101, 189, 277, 364, 454, 505
Contracted pelves. Abnormal presentations. Dystocia. Hæmorrhage. Surgical treatment
Puerperium and Its Complications, 102, 189, 277, 365, 454
Diseases common to infections. Hæmorrhages
Miscellaneous, 102, 189, 277, 365, 506

GENITO-URINARY SURGERY

Kidney and Ureter, 102, 189, 277, 365, 454, 507
Kidney. Ureters
Trauma, calculi, displacement, malformation, hæmorrhage, tumors, inflammations, surgery, functional tests
Bladder, Urethra, and Penis, 102, 190, 278, 366, 455, 509
Trauma, calculi, displacement, malformation, hæmorrhage, tumors, inflammations, surgery
Genital Organs, 102, 190, 278, 366, 455, 512
Testicle. Epididymis. Spermatic cord. Prostate
Miscellaneous, 103, 190, 278, 366, 455

SURGERY OF THE EYE AND EAR

Eye, 103, 190, 279, 366, 455, 513
Glaucoma. Trachoma. Cataract. Inflammations
Ear, 103, 191, 280, 367, 456, 513
Outer ear. Middle ear. Internal ear. Mastoids. Brain abscess of otitic origin, etc.

SURGERY OF THE NOSE, THROAT, AND MOUTH

Nose, Throat, and Mouth (oral surgery), 104, 192, 280, 368, 456, 515
Nose: external, internal
Throat: tonsils, adenoids, larynx, pharynx
Mouth: palate, cleft palate, teeth, tongue
